

Version Update of the General-Purpose Inverter Option FR Configurator2 (Inverter Setup Software)

Thank you for your continued patronage of Mitsubishi Electric drive control products.
The general-purpose inverter option FR Configurator2 (inverter setup software) will be updated and new functions added.

1. Details of the Version Upgrade

(1) Addition of supported models

FR-E820S and FR-E800-SCE inverters will be supported.

(2) Change of supported operating systems

Microsoft® Windows XP® and Microsoft® Windows Vista® operating systems will not be supported anymore.

Trademarks

- Microsoft and Windows are registered trademarks or trademarks of Microsoft Corporation in the United States and other countries.
- The formal name of Windows® XP is Microsoft® Windows® XP operating system.
- The formal name of Windows Vista® is Microsoft® Windows Vista® operating system.

(3) Safety parameter setting enabled (for the FR-E800-SCE only)

Parameters for safety functions can be set.

(4) Addition of models for which the I/O terminal monitor function is available

The I/O terminal monitor function will be available for the FR-E800(-E/-SCE).
(Output signals with setting values larger than "256" cannot be monitored.)

2. Product Identification

The SERIAL (determined by date of production) can be checked on the DVD-ROM and the packaging label.

Y 0 6
Symbol Year Month

SERIAL

The SERIAL consists of one symbol, and two characters indicating the production year and month. The last digit of the production year is indicated as the Year, and the Month is indicated by 1 to 9, X (October), Y (November), or Z (December).

*The SERIAL on the packaging label has additional three characters indicating the control number after the three characters above.

3. Date of Change

The change will be sequentially applied to products manufactured in June 2020 or later.
