

Appearance Change for the MT-RC Power Regeneration Converter (General-Purpose Inverter Option)

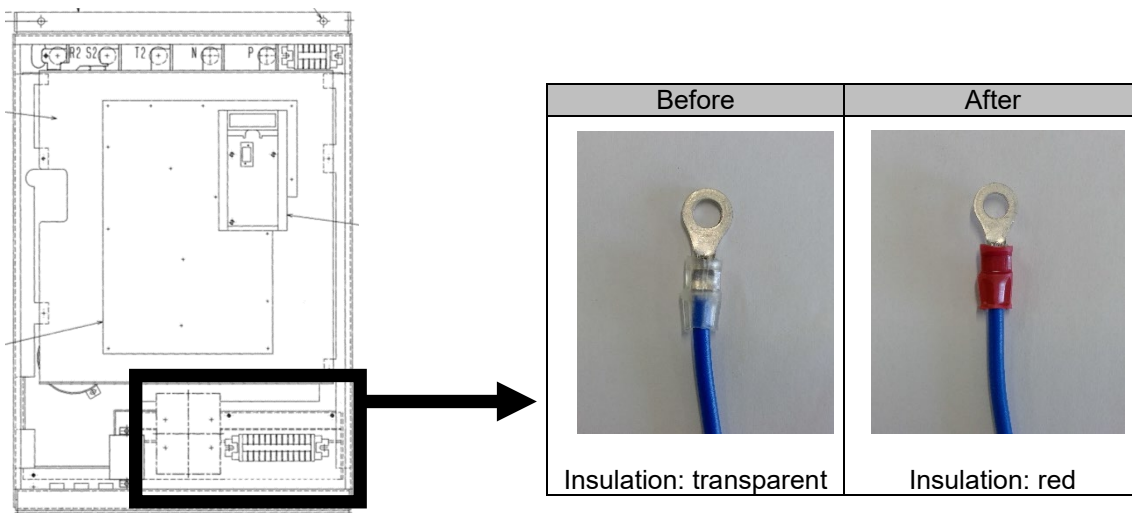

Thank you for your continued patronage of Mitsubishi Electric drive control products. The appearance of crimp terminals for the MT-RC power regeneration converter (general-purpose inverter option) will be changed due to the material change.

1. Products Affected

MT-RC-H75K to H220K

2. Details of the Change

The appearance of crimp terminals for the MT-RC-H75K to H220K will be changed. The change does not affect the quality, performance, or specifications of the products.

Note) Appearance of the product with the front cover removed

3. Date of Change

The change will be sequentially applied to the September 2020 production or later. The schedule may vary depending on the quantity of the existing parts.

4. Product Identification

The products can be identified visually.
