Version Update of the General-Purpose Inverter Option
FR Configurator2 (Inverter Setup Software)

Thank you for your continued patronage of Mitsubishi Electric drive control products.
The general-purpose inverter option FR Configurator2 (inverter setup software) will be updated and new functions added.

1. Details of the Version Upgrade

(1) Addition of supported inverters
   FR-E800 upgraded in August 2020*

   * Details of the firmware upgrade of FR-E800 series inverters are as follows:
      1. FR-A8AP E kit is supported. (Vector control (speed control and torque control) and encoder feedback control will be available.)
      2. EtherNet/IP and PROFINET communications are supported. (Data of parameters, monitor items, and terminals can be accessed.)

   For more information, refer to Sales and Service No. 639E.

2. Product Identification

The SERIAL (determined by date of production) can be checked on the DVD-ROM and the packaging label.

<u>Z   0   8</u>
Symbol Year Month

SERIAL

The SERIAL consists of one symbol, and two characters indicating the production year and month. The last digit of the production year is indicated as the Year, and the Month is indicated by 1 to 9, X (October), Y (November), or Z (December).

* The SERIAL on the packaging label has additional three characters indicating the control number after the three characters above.

3. Date of Change

The change will be sequentially applied to products manufactured in August 2020 or later.
