

UL File Number Change for General-Purpose Inverters

Thank you for your continued patronage of Mitsubishi Electric drive control products. The UL file number of general-purpose inverters will be changed.

1. Products Affected

All UL-listed inverters

2. Details of the Change

The UL file number assigned by UL will be changed as shown in Table 1. If the UL file number of Mitsubishi Electric Corporation is indicated in your factory inspection procedure (UL procedure), Instruction Manuals, and other documents, refer to the new UL file number or overwrite the UL file number to the new number.

This number change does not affect the appearance and specifications of the products.

Table 1: Current and new UL file numbers

	Current	New
File No.	E131592	E113619

3. Date of Change

The UL file number will be changed on December 1, 2020.

The change will be reflected on the web page of UL, where the UL file numbers can be searched, after about one week.
