KC/EAC Marks Added to the FR-E800 Series Inverters

Thank you for your continued patronage of Mitsubishi Electric drive control products.

The KC and EAC marks will be added to the FR-E800 series inverters to show the compliance with the standards.

1. Products Affected

FR-E800 series (7.5K or lower)

2. Details of Change

The KC and EAC marks will be added on the rating plate and the packaging plate of the product as shown in the following table.

The change does not affect the quality, performance, or specifications of the products.

(Example) FR-E840-7.5K-1

Area	Before	After
Rating plate	 <p>KC and EAC marks not applied</p>	 <p>Description KC and EAC marks added</p>
Packaging plate	 <p>KC and EAC marks not applied</p>	 <p>KC and EAC marks added</p>

3. Date of Change

Country of origin	Date of Change
MADE IN JAPAN	The change will be sequentially applied to the products manufactured in January 2021 or later. (The change may be applied to the products manufactured in December 2020.)
MADE IN CHINA	The change will be sequentially applied to the products manufactured in February 2021 or later. (The change may be applied in late January depending on the amount of the remaining inventory.)

The marks may be added on the rating plate only.

4. Product Identification

The product can be identified by the presence/absence of the KC and EAC marks on the rating plate.
