

### Version Update of the General-Purpose Inverter Option FR Configurator2 (Inverter Setup Software)

Thank you for your continued patronage of Mitsubishi Electric drive control products. The general-purpose inverter option FR Configurator2 (inverter setup software) will be updated and new functions added.

#### 1. Details of the Version Update

(1) Addition of supported models

11K to 22K models for the FR-E800, FR-E800-E, and FR-E800-SCE inverters will be supported.

(2) Addition of supported versions of inverter firmware

FR-E800 upgraded in January 2021\*

\* Details of the firmware upgrade of the FR-E800 inverters are as follows:

- 1) Position control
- 2) ST language (PLC function), etc.

For more information, refer to Sales and Service No. 665E.

#### 2. Product Identification

The SERIAL (determined by date of production) can be checked on the DVD-ROM and the packaging label.

AA 1 2  
Symbol Year Month

SERIAL

The SERIAL consists of two symbols, and two characters indicating the production year and month. The last digit of the production year is indicated as the Year, and the Month is indicated by 1 to 9, X (October), Y (November), or Z (December).

\* From this version onwards, the SERIAL will consist of two symbols and two characters indicating the production year and month.

\*The SERIAL on the packaging label has additional three characters indicating the control number after the four characters above.

#### 3. Date of Change

The change will be sequentially applied to products manufactured in February 2021 or later.
