

Version Update of the General-Purpose Inverter Option FR Configurator2 (Inverter Setup Software)

Thank you for your continued patronage of Mitsubishi Electric drive control products.
The general-purpose inverter option FR Configurator2 (inverter setup software) will be updated and new functions will be added.

1. Details of the Version Update

Enhanced AI fault diagnosis function

- The diagnosis function will be available for an inverter overload trip (electronic thermal relay function) and motor overload trip (electronic thermal relay function).
- The accuracy of the diagnosis for an overcurrent trip will be improved.

2. Product Identification

The SERIAL (determined by date of production) can be checked on the DVD-ROM and the packaging label.

AC 1 X
Symbol Year Month

SERIAL

The SERIAL consists of two symbols, and two characters indicating the production year and month. The last digit of the production year is indicated as the Year, and the Month is indicated by 1 to 9, X (October), Y (November), or Z (December).

* The SERIAL on the packaging label has additional three characters indicating the control number after the four characters above.

3. Date of Change

The change will be sequentially applied to products manufactured in October 2021 or later.
