

### Change of the Serial Number Printing Method for the General-Purpose Inverter Options

Thank you for your continued patronage of Mitsubishi Electric drive control products. Three types of serial number printing will coexist for the circuit board of the plug-in option for the inverter options.

#### 2. Details of Change

In addition to ink printing, laser printing will also be used for printing the serial number of the plug-in option's circuit board. Due to this, three types of printing will coexist.

The change does not affect the function, performance, or quality of the products.

(Example) Serial number print of the plug-in option's circuit board

Example of the serial number printing area on the plug-in option's circuit board	Current printing method (ink printing)	Additional printing method (laser printing)
