

Version Update of the General-Purpose Inverter Option FR Configurator2 (Inverter Setup Software)

Thank you for your continued patronage of Mitsubishi Electric drive control products.
The general-purpose inverter option FR Configurator2 (inverter setup software) will be updated and new functions will be added.

1. Details of the Version Update

(1) Addition of supported models

The FR-E846-SCE inverters will be supported.

2. Product Identification

The SERIAL (determined by date of production) can be checked on the packaging plate or the DVD-ROM.

SERIAL example on packaging plate
J 4 1 000
Symbol Year Month Control number

SERIAL

SERIAL example on DVD-ROM
AJ 4 1
Symbol Year Month

SERIAL

The SERIAL on the packaging plate consists of one symbol, two characters indicating the production year and month, and three characters indicating the control number.

The SERIAL on the DVD-ROM consists of two symbols, and two characters indicating the production year and month.

Alphabetical symbols used for versioning are incremented in the ascending order.

The last digit of the production year is indicated as the Year, and the Month is indicated by 1 to 9, X (October), Y (November), or Z (December).

3. Date of Change

The change will be applied to the products manufactured in January 2024 or later.
