Outer Appearance Change for Geared AC Servo Motors

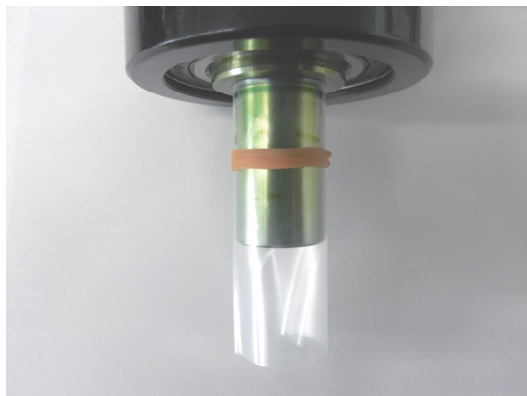

Thank you for your continued patronage of the Mitsubishi general-purpose AC servo and FA products. For the following geared AC servo motors, the outer appearance of the reducer will be partially changed because of the oil change to improve obtainability of the rust preventive oil. We ask for your understanding in this matter.

1. Target Models

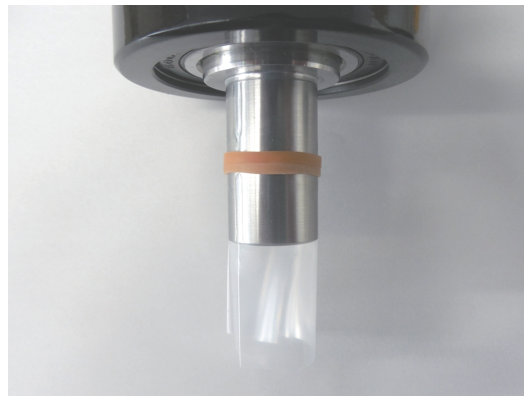

The target models are the following geared servo motors.
G2 geared servo motors of the HC-KFS/MFS/SFS/RFS series

2. Details of the Change

To improve obtainability, the rust preventive oil for the reducers will be changed as shown below (Photo 1).
The change does not affect the functions and performance.

Before change (rust preventive oil: green)

After change (rust preventive oil: clear)

Photo 1. Outer appearance of the motor shaft end

3. Schedule

This change will be made sequentially from the January 2014 production. There may be cases when both new and old products exist in the distribution stage. We ask for your understanding in this matter.

4. Production Discontinuation

The production of the target models will be discontinued on the last day of August 2015. The schedule remains the same.
(Refer to the Sales and Service No.13-20E.)
