Terminal Block Change for the General-Purpose AC Servo Amplifier Optional Unit

Thank you for your continued patronage of the Mitsubishi general-purpose AC servo and FA products. To improve the obtainability of terminal block parts, we will change the terminal block as follows. We ask for your understanding in this matter.

1. Target Models

MR-MT1100, 1200, 1010, and MR-J3-D05

2. Purpose

To improve the obtainability of terminal block parts

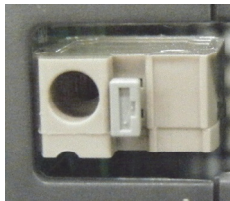

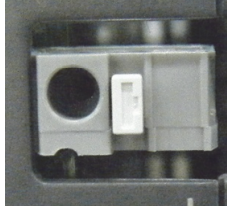

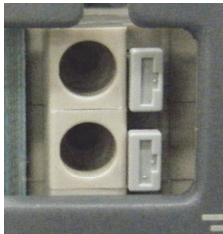

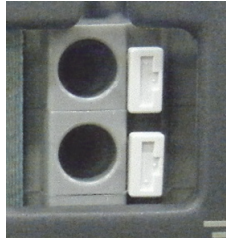

3. Details of Change

The terminal block will be changed.

With the terminal block change, the colors of the products and buttons will be changed.

(Refer to Table 1.)

Table 1 Terminal block change

	Before change (Product color: beige) (Button color: gray)	After change (Product color: gray) (Button color: white)
Outer appearance of one-pin terminal block		
Outer appearance of two-pin terminal block		

4. Schedule

The terminal block change will be made sequentially from the May 2014 production.

There may be cases when both new and old products exist in the distribution stage.

These changes do not affect the servo amplifier functions and performance.
