Connector Addition to the Mitsubishi MR-J4- _A_ -RJ/RU/RZ/KJ Series Servo Amplifier

Thank you for your continued patronage of the Mitsubishi general-purpose AC servo and FA products. For the MR-J4- _A_ -RJ/RU/RZ/KJ series AC servo amplifiers, the CN9 connector will be added to connect the safety option unit MR-D30 as follows. We ask for your understanding in this matter.

1. Target Models

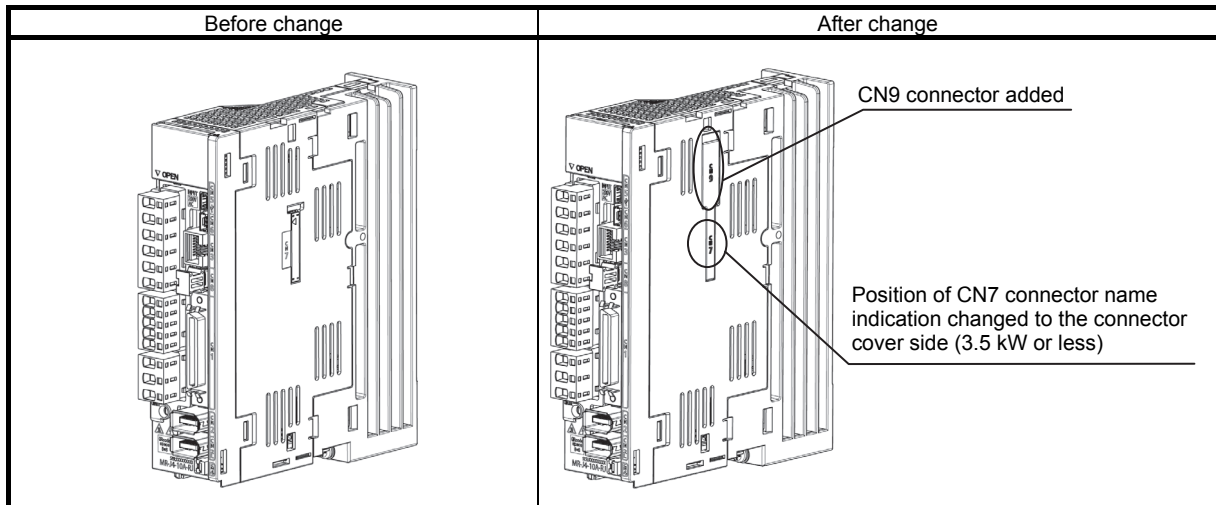

2. Purpose

To connect the safety option unit MR-D30

3. Details of Change

We will add the CN9 connector as follows, and will change the position of the CN7 connector name indication from the side cover of the servo amplifier of 3.5 kW or less to the connector cover side.

Note. The drawing above shows the 100 W model.

4. Schedule

This change will be made sequentially from the November 2014 production. There may be cases when both new and old products exist in the distribution stage. We ask for your understanding in this matter.

The above change does not affect the functions and performance of the servo amplifier.
