

## Sales and Service

### Replacement of the Power Connector Mounting Base for Medium Capacity AC Servo Motors

Thank you for your continued patronage of the Mitsubishi general-purpose AC servo and FA products. The production of HC series medium capacity AC servo motors will be discontinued. The power connector mounting base of the HC series motors will be changed as follows for the improvement of availability at the time of repair. We ask for your understanding in this matter.

#### 1. Target Models

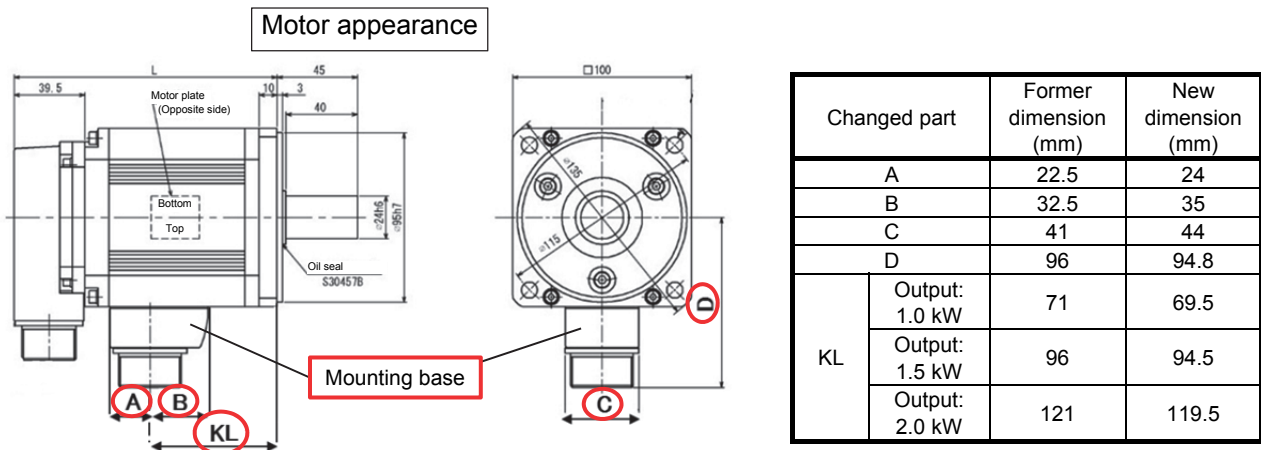

- HC-RF(S) series servo motors (1.0 to 2.0 kW)

#### 2. Details of the Change

Along with the production discontinuation of the HC series, the power connector mounting base of the HC series will be commonalized to the successor models for better availability.

Thus, we will replace the mounting base of the HC series as follows when repairing.

This change does not affect the servo motor functions and performance.

#### 3. Schedule

This change will be made at repair sequentially from April 2016.

There may be cases where both the former and new parts are used depending on the inventory status.
