

AC Servo Sales and Service

Addition of a New Supplier of Connector Dust Caps for AC Servo Motors

Thank you for your continued patronage of the Mitsubishi Electric general-purpose AC servo. To improve the obtainability of the parts, new connector dust caps from a different supplier will be used in addition to the current caps. Note that the appearance is different between the current and new connector dust caps. This change does not affect the functions and performance of the product. We ask for your understanding in this matter.

1. Target Model

- Rotary servo motor: HG-SR/JR/RR/UR/SN series
- Direct drive motor: TM series

2. Details of the Change

Along with the addition of the connector dust caps, the caps with different markings, color and shapes will be distributed in the market at the same time.

* Figure 1 shows the appearance of the connector dust caps as an example, and the appearance varies depending on the model.

* The new connector dust caps will be used for the power supply, encoder, and brake connectors.

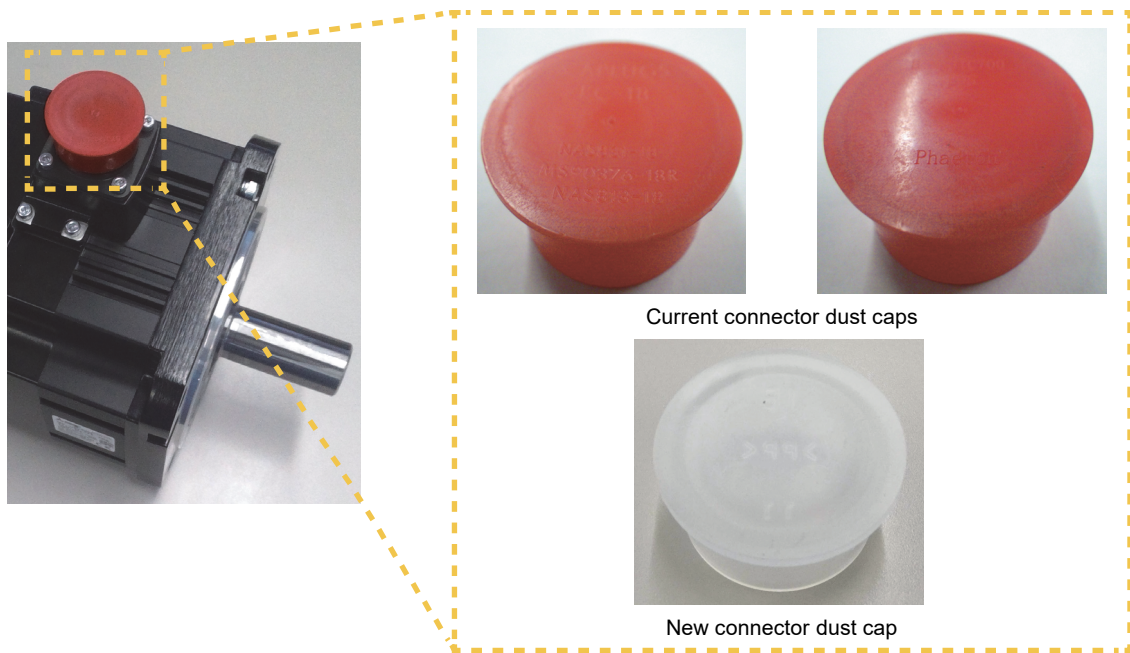

Figure 1. Appearance example

3. Schedule

The new connector dust caps will be used from the January 2020 production.
