

## Sales and Service

### Change in Appearance of Input/Output Signal Connectors of General-Purpose AC Servo Amplifiers

Thank you for your continued patronage of the Mitsubishi Electric AC servo system. The appearance of the input/output signal connectors will be changed as follows. This change does not affect the functions and performance of the products.

**1. Target Model**

MR-J4W2-B, MR-J4W3-B

**2. Reason for the Change**

To improve the obtainability of the parts

**3. Details of the Change**

The input/output signal connectors (CN3) will have tapped holes instead of lock nuts. The existing connector sets and cables will fit into the changed connectors properly.

**4. Schedule**

This change will be made sequentially from the April 2021 production.

Note that, depending on the stock status, the products with both the former and new appearances may be distributed in the market around the same time.
