Rating Plate Change for Incorporated Type Servo System Controller

Thank you for your continued patronage of the Mitsubishi servo system controller and FA products. We will change the rating plate of the incorporated type servo system controller unit. The general specification, performance specification, functions and dimensions remain the same. We ask for your understanding in this matter.

1. Target Models

Product name	Model
Position board	MR-MC210, MR-MC211

2. Details of the Change

- (1) The brand logo (MITSUBISHI ELECTRIC) will be added.
- (2) The rating plate and KC plate (description of KC mark/conformity assessment number) will be integrated.
- (3) A French sentence "Voyez [model] mode d'emploi." will be added to the rating plate.
- (4) The size of the rating plate will be changed.

As an example, the following shows the rating plate of MR-MC210 before change and after change.

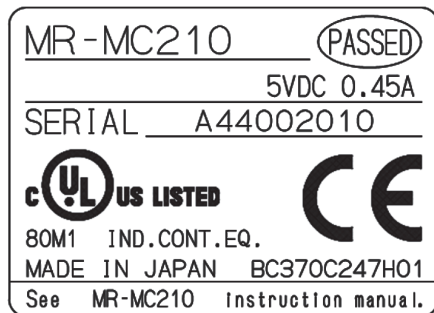

Figure 2.1 Before change

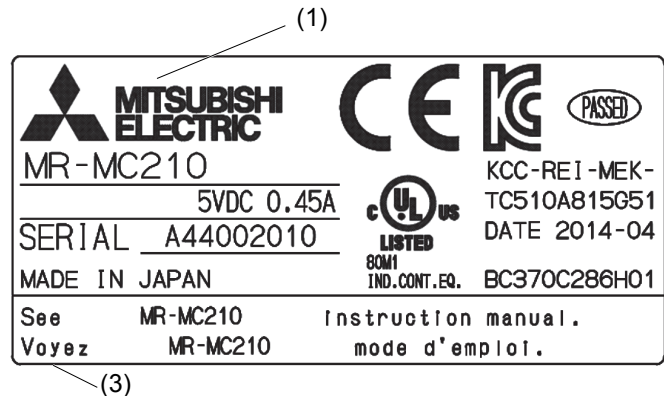

Figure 2.2 After change

3. Schedule

This change will be made sequentially from the June 2014 production.

There may be cases when both new and old products exist in the distribution stage. We ask for your understanding in this matter.
