Change in Appearance of LED Displays on Motion Controllers

Thank you for your continued patronage of the Mitsubishi Electric AC servo system. To improve the visibility of the LED displays on the Motion controllers, the appearance will be changed as follows.

1. Target Model

Q172DCPU(-S1), Q173DCPU(-S1), Q172DSCPU, Q173DSCPU, and their derived models

2. Reason for the Change

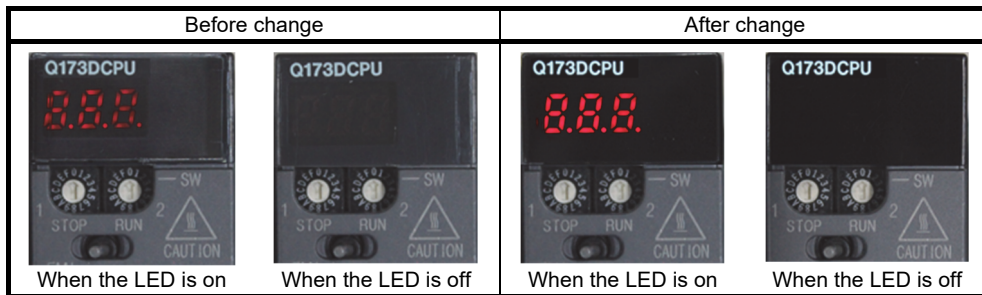

To improve the visibility of the LED displays

3. Details of the Change

The LED displays will be changed as follows:

- (1) The LED brightness will be changed.
- (2) The transparency of the LED lens covers will be changed.

This specification change does not affect the functions and performance of the products.

4. Schedule

This change will be made sequentially from the February 2021 production.

Note that, depending on the stock status, the products with both the former and new LED displays may be distributed in the market around the same time.
