

## Sales and Service

### Change in Rating Plates and Packaging Labels of Servo System Controllers

Thank you for your continued patronage of the Mitsubishi Electric AC servo system.  
The rating plates and packaging labels of servo system controllers will be changed as follows.

#### 1. Target Model

All models of servo system controllers

#### 2. Reason for the Change

After the departure of the United Kingdom (UK) from the European Union (EU), the UKCA marking (equivalent to the CE marking) started to be used for products sold in the UK markets from January 1, 2021. The UKCA marking will be mandatory for servo system controllers from 2022 onwards.

#### 3. Details of the Change

The UKCA mark will be added to the rating plates and packaging labels of servo system controllers. This change does not affect the functions and performance of the products. The following example shows the rating plate and packaging label of the QD77MS4.

Details of the change	Before	After
Rating plate		
Packaging label		

#### 4. Schedule

This change will be made sequentially from the October 2021 production.

Note that, depending on the stock status, the products with both the former and new rating plates and packaging labels may be distributed in the market around the same time.
