[Title] Indication of CE Compatible Product on Packaging

[Date of Issue] Nov. '98

[Relevant Models] CE Compatible MELSEC-A/QnA Series PLC, MELSEC GOT Series
Graphic Operation Terminal

Thank you for your continued patronage of the Mitsubishi general-purpose PLC MELSEC-A/QnA Series and graphic operation terminal MELSEC GOT Series.

Conventionally, the CE compatible product was confirmed only with the presence of a CE Mark indication on the product nameplate attached to the product. Thus, the compatibility could not be confirmed in the packaged state.

To enable confirmation of the CE compatible product in the packaged state, the following CE Mark label will be attached to the package starting with production in October 1998, to indicate that the contained product is a CE compatible product.

CE-Mark label
