

Subject: New option for tracking 'Encoder Distribution Unit'

**Applicable to: RH-F-D series / RH-F-Q series
RV-F-D series / RV-F-Q series**

This technical news describes addition of option 'Encoder Distribution Unit' which expands tracking function.

1. Target model

Model name: RH-F-D series / RH-F-Q series, RV-F-D series / RV-F-Q series

2. Content of change

New option which extends tracking function is added for the above model.

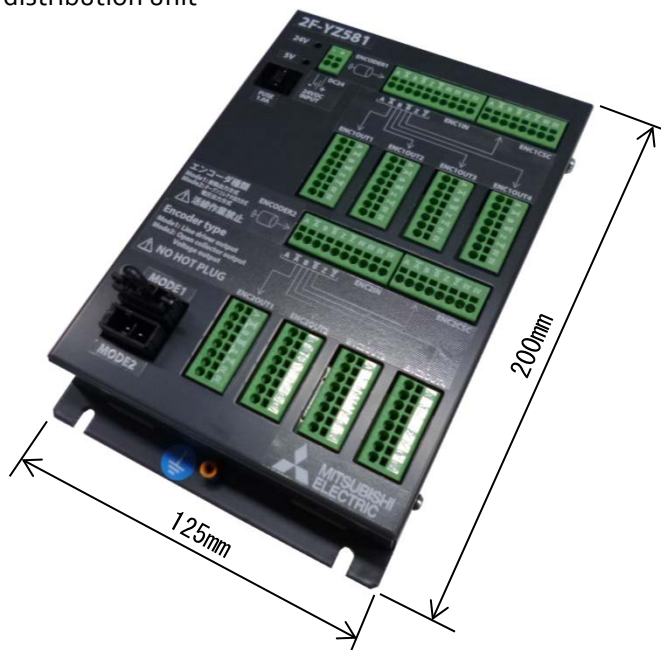

Option name : Encoder Distribution Unit

Model name : 2F-YZ581

The Encoder distribution unit increases the number of robot controller which could be connected to a encoder (from one encoder to multiple encoders). Please refer to the accompanying material for details.

Please see Encoder distribution unit manual (BFP-A3300) for the details such as specifications.

Encoder distribution unit

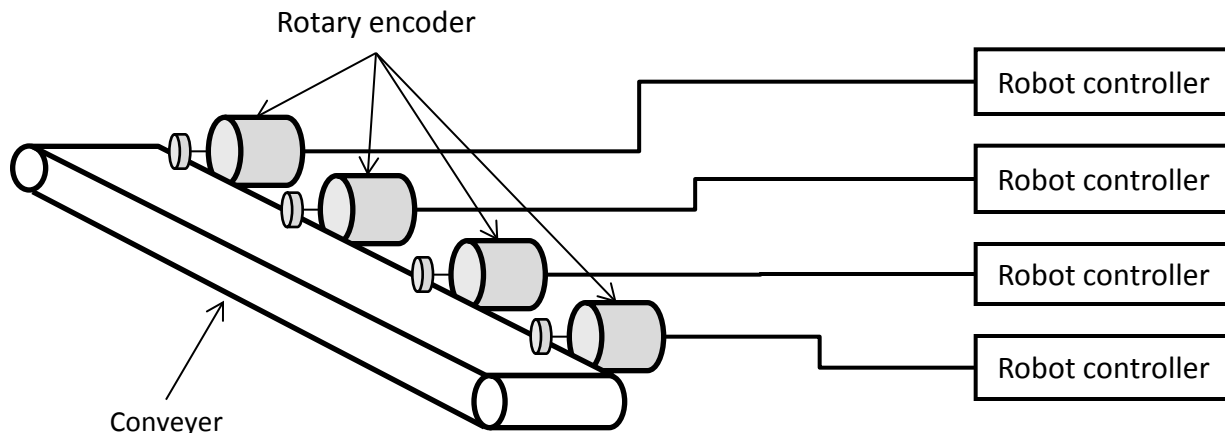

3. Time of change

After Apr, 2014.

Accompanying material: Comparison of connection

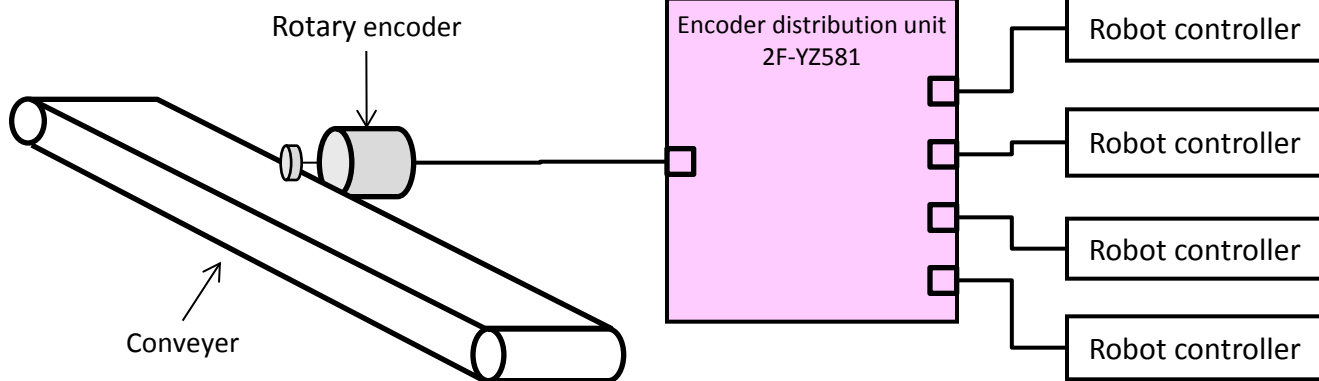

Previous connection

Only one robot controller for one encoder.

Connection with Encoder distribution unit

Multiple robot controller for one encoder.
