

## Production Discontinuation of the Ethernet Communication Special Adapters and Ethernet Interface Blocks of the MELSEC-F Series

**■Date of Issue**

August 2023

**■Relevant Models**

FX3U-ENET-ADP, FX3U-ENET-L, SW1D5-FXENETL-E

Thank you for your continued support of Mitsubishi Electric programmable controllers, MELSEC-F series. This technical bulletin informs you that production of the following MELSEC-F series models will be discontinued. We appreciate your kind understanding.

### 1 MODELS TO BE DISCONTINUED

Product	Model
Ethernet communication special adapter	FX3U-ENET-ADP
Ethernet interface block	FX3U-ENET-L
FX Configurator-EN-L	SW1D5-FXENETL-E

### 2 SCHEDULE

- Start of make-to-order production: April 1, 2024
- Order acceptance: Until December 31, 2024
- Production discontinuation: March 31, 2025

### 3 REASONS FOR DISCONTINUATION

In recent years, as interest in cybersecurity of IoT devices has increased, network vulnerabilities in the programmable controller-related products have been pointed out.

The firmware update function cannot be installed to the FX3 series. The only option is to purchase other products that have the function, but it does not lead to prompt defense against cyber attacks.

To keep your equipment and facility more secure, change your system with the FX3 series to that with the MELSEC iQ-F series. The FX3 series Ethernet-related models will be discontinued.

### 4 REPAIR SUPPORT

Repair acceptance: Until March 31, 2032 (for seven years after the discontinuation of production)

(Note that, even during the repair acceptance period, the repair will not be supported if the parts run out of stock.)

FX Configurator-EN-L is not covered by repair.

## 5 ALTERNATIVE MODELS

### FX3U-ENET-ADP

The following table lists the alternative models for the system including the FX3U-ENET-ADP.

Current model (MELSEC-F series)	Alternative model (MELSEC iQ-F series) <sup>*1</sup>
FX3U main unit + FX3U-ENET-ADP	FX5UJ, FX5U, or FX5UC CPU module
FX3G main module + FX3U-ENET-ADP	FX5S or FX5UJ CPU module
FX3S main unit + FX3U-ENET-ADP	FX5S CPU module

\*1 When the MELSEC iQ-F series are used, GX Works3 is required.

### FX3U-ENET-L

The following table lists the alternative models for the system including the FX3U-ENET-L.

Current model (MELSEC-F series)	Required function	Alternative model (MELSEC iQ-F series) <sup>*1</sup>
FX3U main unit + FX3U-ENET-L	E-mail send function	FX5UJ, FX5U, or FX5UC CPU module + FX5-ENET <sup>*2</sup>
	Functions other than the E-mail send function	FX5S, FX5UJ, FX5U, or FX5UC CPU module

\*1 When the MELSEC iQ-F series are used, GX Works3 is required.

\*2 Use the modules manufactured on and after April 2023.

## 6 COMPARISON OF SPECIFICATIONS

The following table shows the specifications comparison between the models to be discontinued and alternative models (MELSEC iQ-F series).

Item	Model to be discontinued		Alternative models	
	FX3U-ENET-ADP	FX3U-ENET-L	FX5S, FX5UJ, FX5U, or FX5UC CPU module	FX5-ENET
Available functions	MELSOFT connection		MELSOFT connection	
	Communication using the MC protocol (1E frame)		SLMP server function (1E/3E frame)	
	MELSOFT direct connection	—	MELSOFT direct connection	
	Find CPU function	—	Find CPU function	
	Time setting function (SNTP client)	—	SNTP client function	—
	—	E-mail send function	—	E-mail send function
	Data monitoring function	—	Web server function	
	—	Communications using the fixed buffer	Socket communication function	
Maximum number of connections	4	4	8 <sup>*1</sup>	32 <sup>*2</sup>
Current consumption of extension devices	External 24VDC	—	Not supported <sup>*3</sup>	—
	Internal 5VDC	30mA		—
	Internal 24VDC	—		110mA
