

**GOT & Network Monitoring Signal Tower Interactive Solutions**

**A New Network Monitoring**

Collectively manage equipment errors and remotely monitor worksite on GOT

Notify errors in production with light and voice

**Alert with light and voice**

**Network Monitoring Signal Tower**

- Alert with light  
Notifying remotely by the signal tower for the occurring error at site.
- Alert with voice  
Voice alert is available.  
Pre-recorded messages can advise more in detail about the occurring error.

Line 1 error occurred.

**Check alarm details and equipment information**

**Personal computer**

The equipment status including errors can be checked with a personal computer in the office.  
[GOT Mobile function]

**Mobile phones and tablets**

Errors in production can be checked from a remote location, enabling quick error handling.  
[GOT Mobile function]

Maintenance office

SLMP

Remote offices or worksites

**System configuration**

- GOT  
MITSUBISHI ELECTRIC GOT2000 Series (GT27 and GT25 models)  
\* A license key is required to use the GOT Mobile function.
- Network Monitoring Signal Tower  
PATLITE NH-FV2 Series
- Connection type  
Ethernet (microcomputer connection using the MC protocol 4E frame)
- Number of units  
Multiple NH-FV2 Series signal towers per GOT (UDP connection)

**What is SLMP?**

SLMP is a protocol to access SLMP-compatible equipment from an external device by Ethernet. For communication between the NH-FV2 Series signal tower and GOT, the 4E frame of MC protocol is used as the message format.

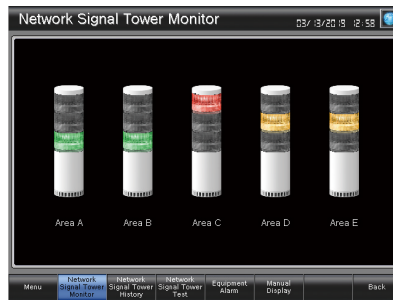

**Collective management**

**GOT**  
All equipment errors can be collectively managed with GOT.

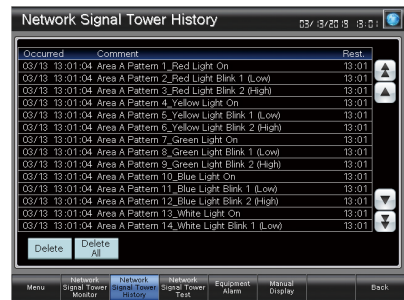

## ■ GOT sample screens

A set of GOT sample screen data is provided. The operation status and history of each Network Monitoring Signal Tower can be checked using the sample screens. Configure the settings for each signal tower according to the contents of the sample screens. The data set is included in HMI/GOT Screen Design Software GT Works3.

[Monitor screen]

The operation status of the Network Monitoring Signal Tower can be checked with lamps.

[Operation history screen]

The operation history of the Network Monitoring Signal Tower can be checked with messages.

## ■ GOT

# GOT2000

Graphic Operation Terminal

- **Enhanced interfaces that meet system design needs**  
SD memory card, Ethernet, RS-232, and RS-422/485 communication interfaces, and USB ports (host\* and device) are standard features.  
\* GT27, GT25, GT23, GT21 wide models.
- **Simple operation with multi-touch and gesture functions\***  
Zoom in to easily operate small and hard to reach switches. After zooming in, scroll the display to show the area you want to operate. \* GT27 only
- **A wide variety of functions**  
Useful functions are available, such as the GOT Mobile function\* that enables you to remotely check the controller status, the backup/restoration function, and the sequence program monitor (Ladder) function\*. \* GT27 and GT25 only

### ⚠ Precautions for safe use

To use the products given in this publication properly, always read the relevant manuals before beginning operation.

The actual color may differ slightly from the pictures in this catalog.  
The actual display may differ from what are shown on GOT screen images.

## ■ Network Monitoring Signal Tower

# Signal Tower

For Network & Security Solutions

NHL-3FV2-RYG

### Stylish, more refined for the office

In a simple off-white color design, it makes the undertone harmonious with the interior design or surrounding equipment. The simple design melds with the space easily, and as an information display, its distinguished presence is demonstrated when the lights are out.

### ● Variety of Monitoring Functions

- PING Device Monitor
- SNMP Transmission
- Application Monitor
- Self-diagnosis
- Ample Communication Commands
- RSH
- SOCKET Transmission

### ● Setup Functions for Detailed Reports

- E-mail Transmission
- SNMP TRAP Transmission
