*1 An attachment is usable when the control panel has a thickness of 2 to 3 mm.
 When replacing a GOT with one with attachment installed, the protection structure is IP4X. The GOT is not compliant with IP67F waterproof/dustproof rating.
 The specifications of the former attachment are the same as those of the new attachment.

2 Details of the change

The fitting positions and shape of the panel installation part on the top of the attachment will be changed.
 With this change, you can install the GOT2000 series using four fittings at four fixing positions.
 With three fittings, the GOT has satisfied the vibration resistance specification for GOTs before the change.
 Even before or after the change, you can use the GOT1000 series with the four fittings at four fixing positions.

3 How to check the models affected

The hardware versions of the models affected will be changed according to the change.

Product	Model	Before	After
Attachment	GT15-70ATT-98	A	B or later

The rightmost of the model name indicated on the attachment's rear face is the hardware version.

4 Schedule

The change will be made sequentially from the July 2022 shipment.
