

Precautions for Display Cable Attachment

■Date of Issue

May 2020

■Relevant Models

MI2012-W, MI2012-W-CL

Thank you for your continued support of Mitsubishi Electric industrial PC, MELIPC series.

We will inform you about precautions for attaching a display connector to an MI2012-W or MI2012-W-CL.

1 ATTACHABLE DISPLAY CONNECTORS

The following shows the display connectors that can be attached to the I/O interfaces of an MI2012-W and MI2012-W-CL.

Model name	I/O interface	Attachable display connector
MI2012-W	(1) DVI-I (1920 × 1080 @ 60 Hz 24 bpp supported)	DVI-I, DVI-D, DVI-A
MI2012-W-CL	(2) HDMI (1920 × 1080 @ 24 Hz 24 bpp supported)	HDMI

Precautions

DisplayPort is not supported though it has the same connector shape as an HDMI port.

Attaching a different display connector may cause a failure.

Check the display connector type in advance, and attach a cable properly.

2 PRECAUTIONS FOR ATTACHING AN HDMI CABLE

Pay attention to the orientation of an HDMI cable, and attach the cable along the bottom edge of an HDMI port.
