

Bring shop floor monitoring to various locations

**GT SoftGOT2000** + **GOT Mobile**

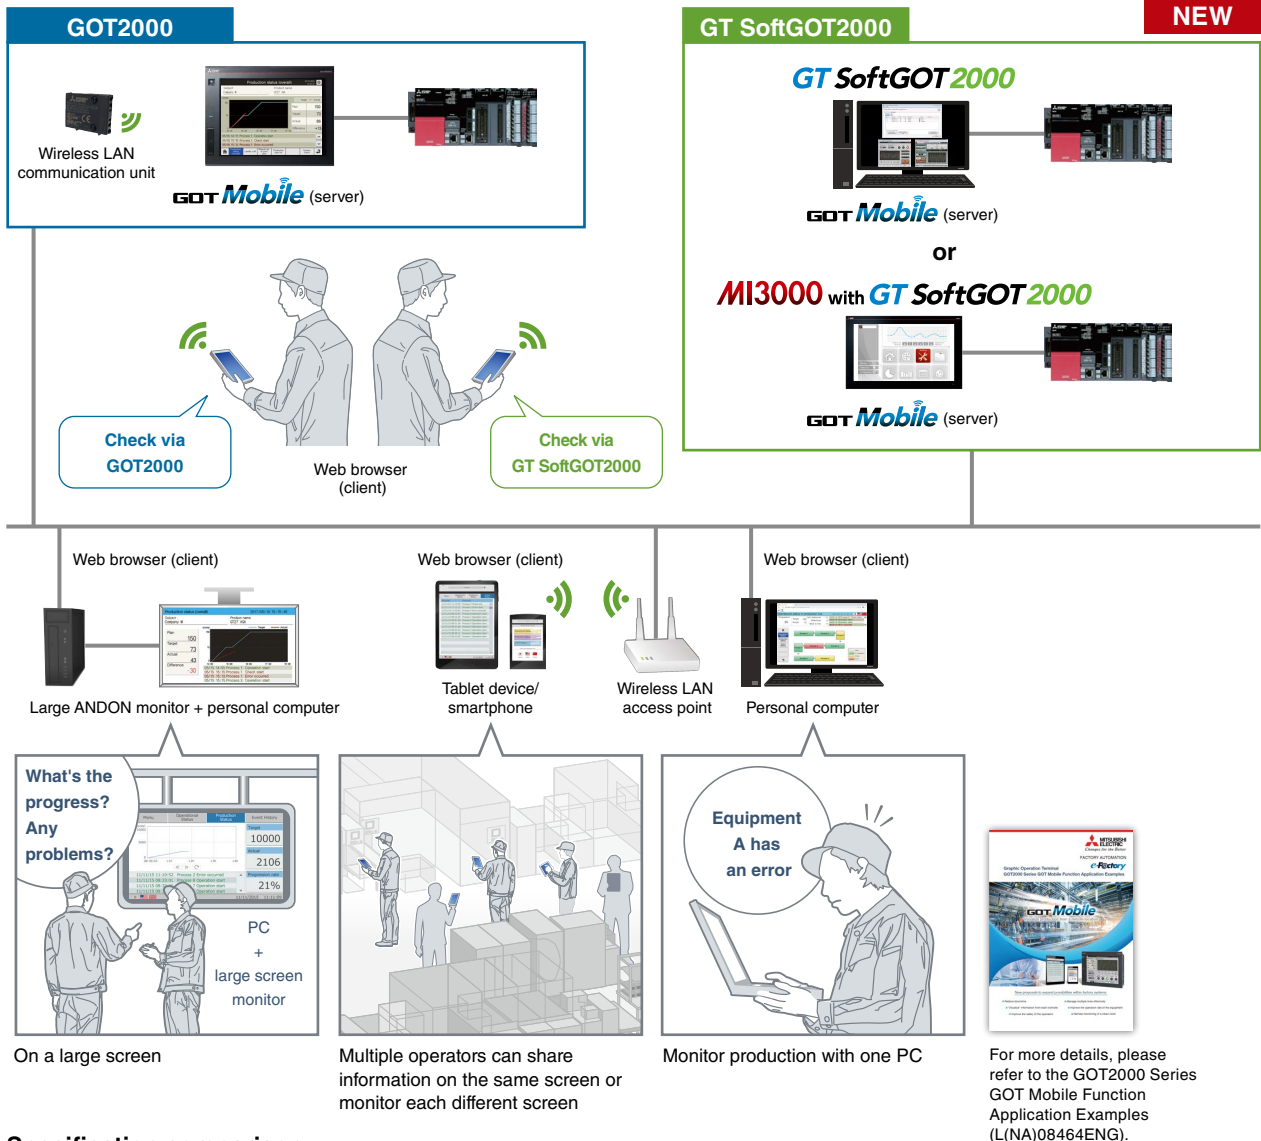

**GT SoftGOT2000 now supports the GOT Mobile function**

- Easy remote monitoring just with a personal computer at the shop floor
- Visualize the entire factory

## GOT Mobile function

With the GOT Mobile function, the equipment status can be checked via on-site GOT or GT SoftGOT2000 using a web browser on information devices from a remote location. Multiple information devices can simultaneously access the GOT or GT SoftGOT2000 so that you can view and operate a different screen on each device.

\* The GOT Mobile Function License is required to use the GOT Mobile function.

### Specification comparison

GOT Mobile function server	Number of simultaneous connections from clients	Required license
GOT2000	Maximum <b>5</b>	• GOT Mobile Function License for GOT2000
GT SoftGOT2000	Maximum <b>15</b>	• License key for GT SoftGOT2000 • GOT Mobile Function License for GT SoftGOT2000

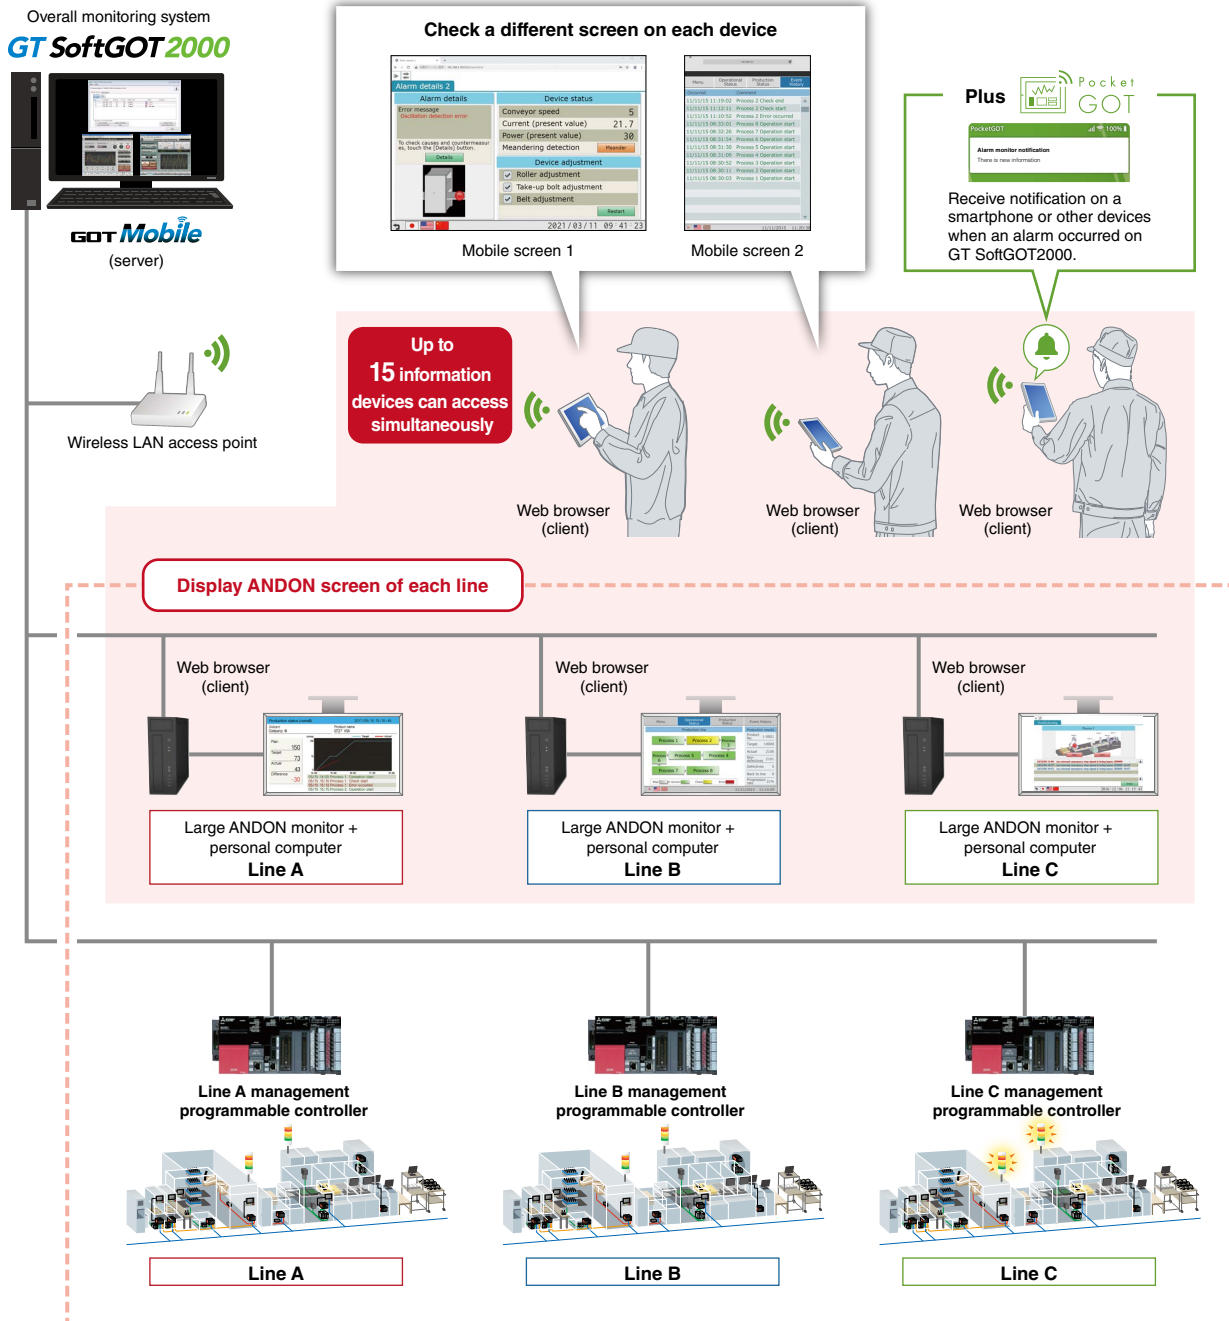

## GT SoftGOT2000

GT SoftGOT2000 is the HMI software that runs on personal computers and panel computers. It can be used to monitor and operate the information of industrial devices that are connected to a personal computer or a panel computer via a network.

## What is realized with GT SoftGOT2000 and the GOT Mobile function

The GOT Mobile function can be added to the overall monitoring system that utilizes GT SoftGOT2000 in order to setup multiple ANDON monitors, monitor the shop floor from your office, and visualize the entire factory. The equipment status can also be checked on mobile devices so that you can perform maintenance work smoothly.

### Restrictions

- This function is supported only when using GT SoftGOT2000 (Multi-channel).
- When using the Pocket GOT mobile app with the GOT Mobile function, up to 20 information devices can be used.
