

INVERTER

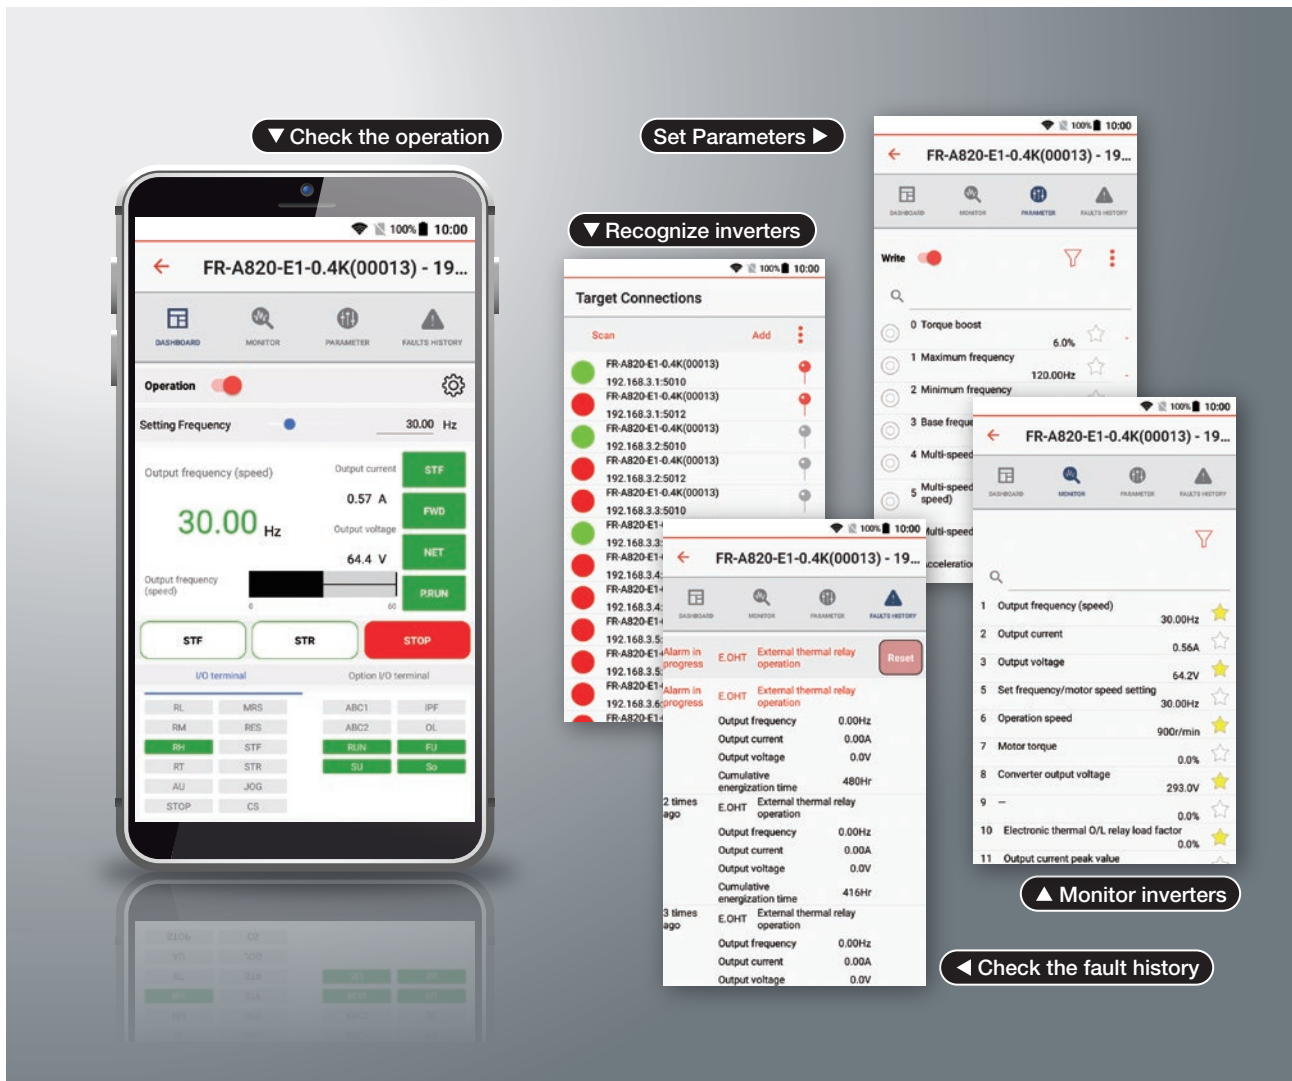

**New Product RELEASE** No.19-3E

# Release of FR Configurator Mobile (Mobile App for Inverters)

Our new mobile app for the FR-A800-E and FR-F800-E inverters is now released.

**Features**

The app enables operation of inverters using smart phones or tablets.

**Download  
the free app now**

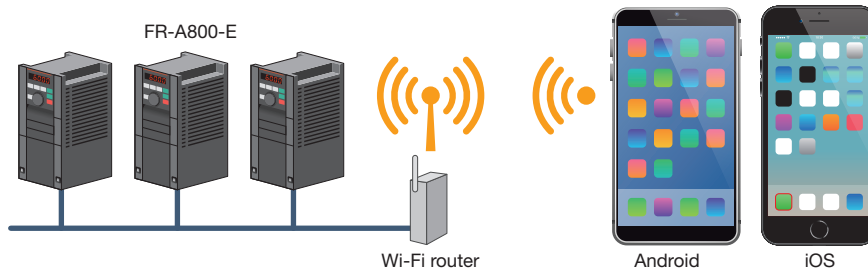

## Compatible inverters

FR-A800-E, FR-F800-E

## System configuration

Item	Description
Supported device	Android™ (smart phone / tablet) iPhone/iPad
Supported OS	Android 6.0 or later iOS 10.0 or later
Supported language	Japanese English
Download	Official website (Google Play / Apple App Store)
Communication	Wi-Fi (Ethernet communication)

Ensure that the device can be connected to the wireless LAN.

Use a wireless LAN suitable for the industrial use in severe environments or in environments requiring high reliability (redundancy).

Under certain environments or installation conditions, Ethernet communication through wireless LAN is not as stable as communication through wired LAN. Before starting operation, always check the communication status.

## Setting procedure

**1** Wire inverters and a Wi-Fi router by referring to "System configuration".

**2** Set the following inverter parameters.

Pr.	Name	Description
1434 to 1437	Ethernet IP address 1 to 4	Enter the IP address of the inverter.
1438 to 1441	Subnet mask 1 to 4	Enter the subnet mask of the network to which the inverter belongs.
1427 to 1429	Ethernet function selection 1 to 3	Set any value from "5010 to 5013" (SLMP) in a parameter.

The settings are applied after an inverter reset or at the next power-ON.

**3** Connect your device to Wi-Fi and starts the app.
