

## Servo Motor < HF-JP Series (11 to 15kW) >

New low inertia and large capacity (11kW to 15kW) servo motor has been added to MELSERVO-J3 Series compatible HF-JP motor lines. The HF-JP series is a high-speed servo motor having a rated speed of 1500r/min and maximum speed of 3000r/min.

The HF-JP series is equipped with a high-resolution absolute encoder with 262144p/rev as standard specification.

As compared to the previous model HA-LP series, HF-JP has achieved a reduction in mass and volume (up to 46% in volume and 34% in mass). The HF-JP series has realized less wiring and a higher IP code (from IP44 to IP67) by replacing the power supply terminal box with a connector and by removing the cooling fan.

The HF-JP series is well suited for "high-throughput positioning" and "high acceleration/deceleration", due to the use of internal permanent magnets, which strengthen the rotor structure and allow for higher velocities (increased from 2000r/min to 3000r/min).

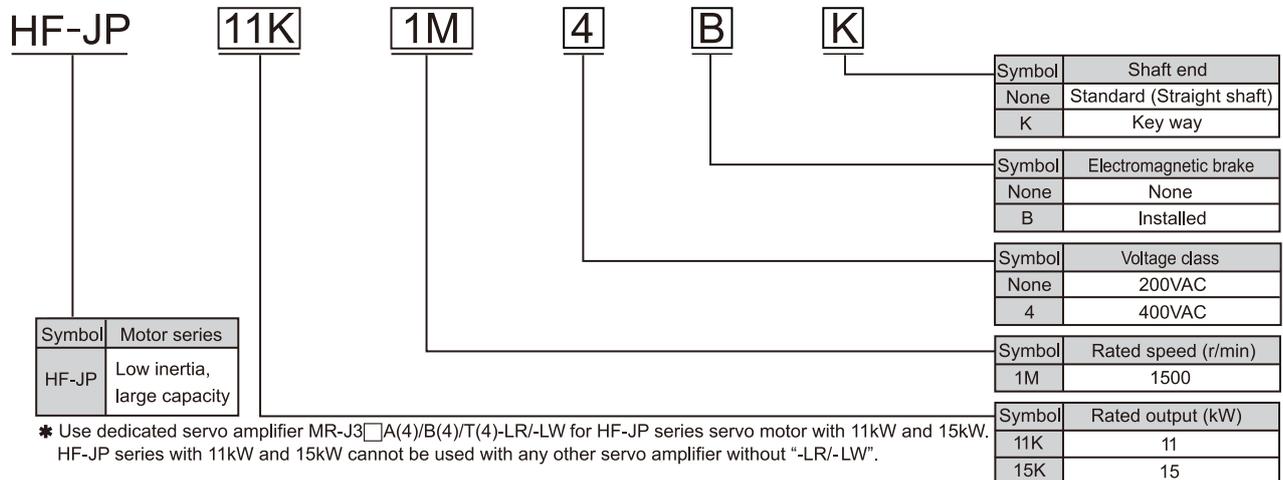

Thus, this servo motor particularly is suitable for injection molding machines and large press machines.

The HF-JP series will be compatible with global standards (EN, UL and c-UL standards).

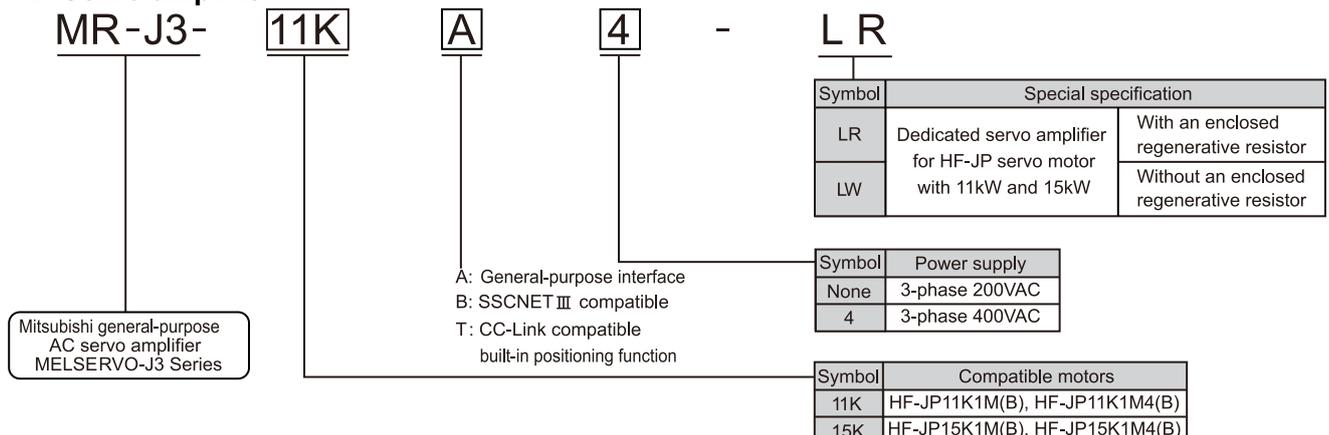

### Model configurations

#### ● Servo motor

#### ● Servo amplifier

## Servo motor specifications

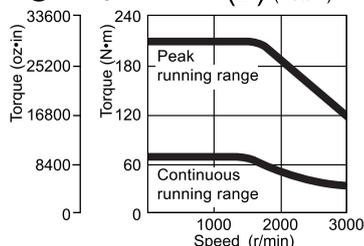

Servo motor series		HF-JP1500r/min series (low inertia, large capacity)			
		200VAC		400VAC	
Servo motor model		HF-JP11K1M(B)	HF-JP15K1M(B)	HF-JP11K1M4(B)	HF-JP15K1M4(B)
Compatible servo amplifier model		MR-J3-11KA/B/T-LR	MR-J3-15KA/B/T-LR	MR-J3-11KA4/B4/T4-LR	MR-J3-15KA4/B4/T4-LR
Power supply capacity (Note 1) (kVA)		16	22	16	22
Continuous running duty	Rated output (kW)	11	15	11	15
	Rated torque (N·m [oz·in])	70 (9910)	95.5 (13500)	70 (9910)	95.5 (13500)
Maximum torque (N·m [oz·in])		210 (29700)	286 (40500)	210 (29700)	286 (40500)
Rated speed (r/min)		1500			
Maximum speed (r/min)		3000			
Permissible instantaneous speed (r/min)		3450			
Power rate at continuous rated torque (kW/s)		223 (204)	290 (271)	223 (204)	290 (271)
Rated current (A)		60	76	32	38
Maximum current (A)		200	246	100	123
Regenerative braking frequency (Note 2, 3) (times/min)		143	162	143	162
Moment of inertia J (X10 <sup>-4</sup> kg·m <sup>2</sup> ) [J (oz·in <sup>2</sup> )]	Standard	220 (1200)	315 (1720)	220 (1200)	315 (1720)
	With electromagnetic brake	240 (1310)	336 (1840)	240 (1310)	336 (1840)
Recommended load to motor inertia moment ratio		Maximum of 10 times the servo motor's inertia moment (Note 4)			
Speed/position detector		18-bit encoder (Resolution per encoder/servo motor rotation: 262144 p/rev)			
Attachments		Oil seal			
Insulation class		Class F			
Structure		Totally enclosed non-ventilated (IP code: IP67) (Note 5)			
Environment (Note 7)	Ambient temperature	0 to 40°C (32 to 104°F) (non freezing), storage: -15 to 70°C (5 to 158°F) (non freezing)			
	Ambient humidity	80% RH maximum (non condensing), storage: 90% RH maximum (non condensing)			
	Atmosphere	Indoors (no direct sunlight); no corrosive gas, inflammable gas, oil mist or dust			
	Elevation	1000m or less above sea level			
Vibration (Note 6)		X: 24.5m/s <sup>2</sup> Y: 24.5m/s <sup>2</sup>			
Mass (kg [lb])	Standard	62 (140)	86 (190)	62 (140)	86 (190)
	With electromagnetic brake	74 (165)	97 (215)	74 (165)	97 (215)

- Notes:
- The power supply capacity varies depending on the power supply's impedance.
  - The regenerative braking frequency shows the permissible frequency when the motor decelerates from the rated speed to a stop. The value applies when external regenerative resistors, GRZG400-□Ω, (standard accessory for MR-J3-□A(4)/B(4)/T(4)-LR) are used with cooling fans (2 units of 92 X 92mm, minimum air flow: 1.0m<sup>3</sup>/min). Note that change in parameter No. PA02 is required.
  - Use dedicated regenerative resistors for MR-J3-11KA(4)/B(4)/T(4)-LR and MR-J3-15KA(4)/B(4)/T(4)-LR. Refer to the section "Options ● Optional regeneration unit" in this New Product Release for details.
  - Contact Mitsubishi if the load to motor inertia moment ratio exceeds the value in the table.
  - The shaft-through portion is excluded.
  - The vibration direction is shown in the diagram to the right. The numeric value indicates the maximum value of the component (commonly the bracket in the opposite direction of the motor shaft). Fretting of the bearing occurs easily when the motor stops, so maintain vibration to approximately one-half of the allowable value.
  - In the environment where the servo motor is exposed to oil mist, oil and/or water, a standard specification servo motor may not be usable. Contact Mitsubishi for more details.

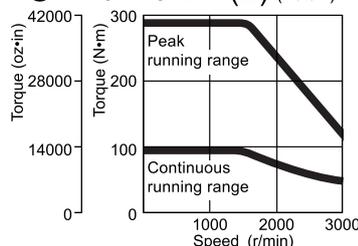

## Servo motor torque characteristics

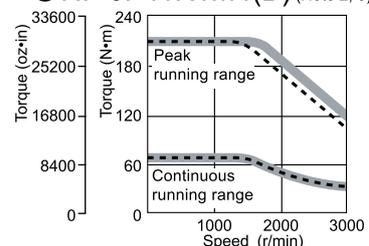

● HF-JP11K1M(B) (Note 1)

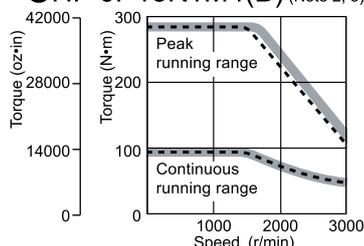

● HF-JP15K1M(B) (Note 1)

● HF-JP11K1M4(B) (Note 2, 3)

● HF-JP15K1M4(B) (Note 2, 3)

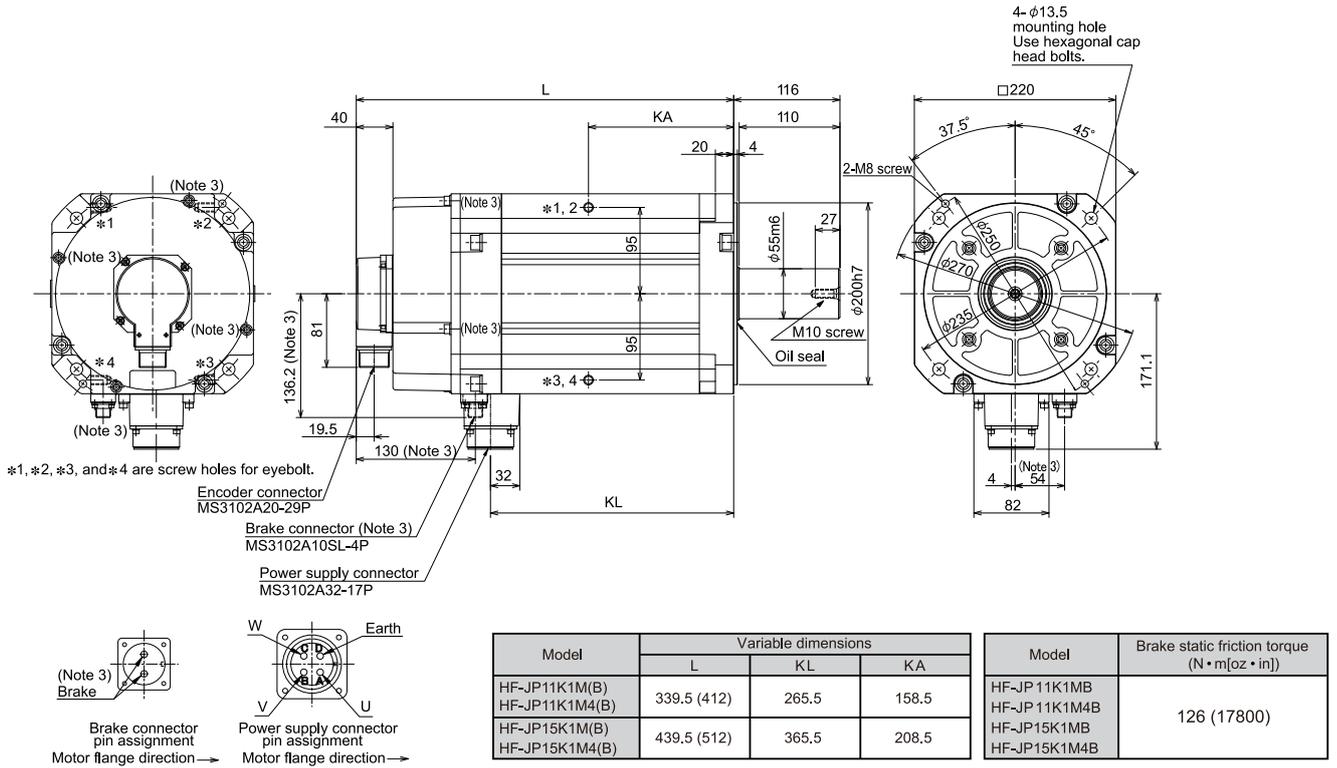

Notes:

- : For 3-phase 200VAC.
- : For 3-phase 400VAC.
- - - : For 3-phase 380VAC.

# Servo motor dimensions

(Unit: mm)

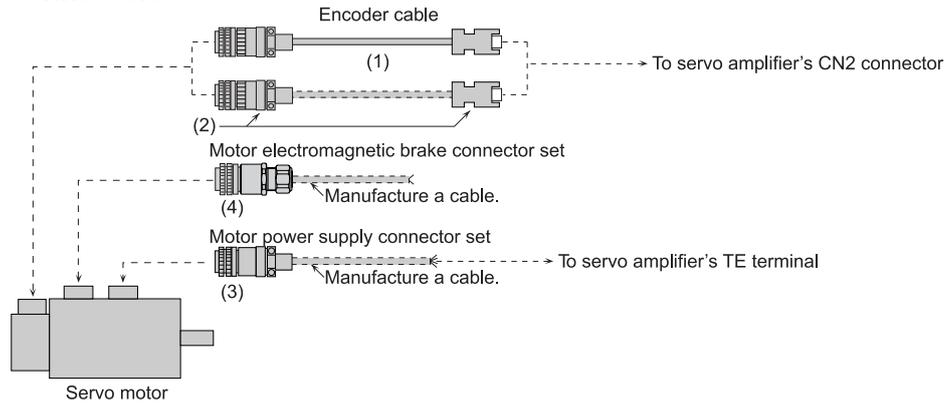

## ● HF-JP11K1M(B), HF-JP15K1M(B), HF-JP11K1M4(B), HF-JP15K1M4(B)

- Notes: 1. Use a friction coupling to fasten a load.  
 2. Dimensions inside ( ) are for the models with an electromagnetic brake.  
 3. Only for the models with an electromagnetic brake. The electromagnetic brake terminals do not have polarity.  
 4. For dimensions where there is no tolerance listed, use general tolerance.

## Options

### Cables and connectors

Item		Model	IP code (Note 2)	Description
For Encoder	(1) Encoder cable	MR-ENECBL□M-H (Note 1) □=cable length: 2, 5, 10, 20, 30, 40, 50m	IP67	Amplifier connector 36210-0100PL (receptacle, 3M) 36310-3200-008 (shell kit, 3M), or 54599-1019 (connector set, Molex)  Encoder connector (DDK) D/MS3106A20-29S(D190) (plug) CE02-20BS-S-D (backshell) (straight) CE3057-12A-3-D (cable clamp)
	(2) Encoder connector set	MR-ENECNS	IP67	Amplifier connector 36210-0100PL (receptacle, 3M) 36310-3200-008 (shell kit, 3M), or 54599-1019 (connector set, Molex)  Encoder connector (DDK) D/MS3106A20-29S(D190) (plug) CE02-20BS-S-D (backshell) (straight) CE3057-12A-3-D (cable clamp)
For motor power supply	(3) Power supply connector set	MR-PWCNS3 (Straight type)	IP67	Motor power supply connector (DDK) CE05-6A32-17SD-D-BSS (plug) (straight) CE3057-20A-1-D (cable clamp)  <Applicable cable example> Wire size: 14mm <sup>2</sup> (AWG6) to 22mm <sup>2</sup> (AWG4) Completed cable outer diameter: φ22 to 23.8mm
For motor electromagnetic brake	(4) Brake connector set	MR-BKCN (Straight type)	IP67	Motor brake connector D/MS3106A10SL-4S(D190) (plug, DDK) YSO10-5 to 8 (cable clamp (straight), Daiwa Dengyo)  <Applicable cable example> Wire size: 0.3mm <sup>2</sup> (AWG22) to 1.25mm <sup>2</sup> (AWG16) Completed cable outer diameter: φ5 to 8.3mm

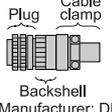

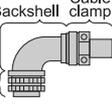

Notes: 1. -H and -L indicate bending life. -H indicates long bending life, and -L indicates standard bending life.

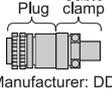

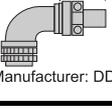

2. The IP code indicated is for the connector's protection against ingress of dust and water when coupled to a servo amplifier/servo motor.  
If the IP code of the servo amplifier/servo motor differs from that of these connectors, overall IP code depends on the lowest of all.

## ■ Ordering information for customers

Notes: 1. Not compliant with EN standards.

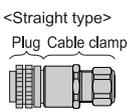

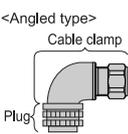

2. The IP code indicated is for the connector's protection against ingress of dust and water when coupled to a servo amplifier/servo motor. If the IP code of the servo amplifier/servo motor differs from that of these connectors, overall IP code depends on the lowest of all.

## ■ Options

### ● Optional regeneration unit

The power values in this table are resistor-generated powers, not rated powers.

Applicable servo amplifier model	Tolerable regenerative power (W) of standard accessory (external regenerative resistor) (Note 1)				Tolerable regenerative power (W) of optional regeneration unit (Note 1)			
	GRZG400-0.8Ω×4	GRZG400-0.6Ω×5	GRZG400-2.5Ω×4	GRZG400-2Ω×5	MR-RB5R [3.2Ω]	MR-RB9F [3Ω]	MR-RB5K-4 [10Ω]	MR-RB6K-4 [10Ω]
MR-J3-11KA/B/T-LR	500 (800)	-	-	-	500 (800)	-	-	-
MR-J3-15KA/B/T-LR	-	850 (1300)	-	-	-	850 (1300)	-	-
MR-J3-11KA4/B4/T4-LR	-	-	500 (800)	-	-	-	500 (800)	-
MR-J3-15KA4/B4/T4-LR	-	-	-	850 (1300)	-	-	-	850 (1300)

Notes: 1. The values in ( ) indicate when cooling fans (2 units of 92 X 92mm, minimum air flow: 1.0m<sup>3</sup>/min) are installed, and parameter No. PA02 is changed.

### \* Cautions when connecting the optional regeneration unit.

1. The optional regeneration unit causes a temperature rise of 100°C or more relative to the ambient temperature. Fully examine heat dissipation, installation position, wires used, etc. before installing the unit. Use flame-resistant wires or apply flame retardant on wires. Keep the wires clear of the unit.
2. Always use twisted wires, maximum length of 5m, to connect the optional regeneration unit with the servo amplifier.
3. Always use twisted wires for a thermal sensor, and make sure that the sensor does not fail to work properly due to inducted noise.

- Notes:
- Servo amplifiers (MR-J3-11K□(4)-LW and MR-J3-15K□(4)-LW), without an enclosed regenerative resistor, are also available.
  - To increase the regeneration braking frequency, install cooling fans (2 units of 92 X 92mm, minimum air flow: 1.0m<sup>3</sup>/min) and change parameter No. PA02. The cooling fans must be prepared by user.
  - By installing a thermal sensor, create a safety circuit that shuts off the main circuit power supply when abnormal overheating occurs.
  - The G3 and G4 terminals are thermal sensor. G3-G4 opens when the regenerative unit overheats abnormally.
