

# Mitsubishi General-Purpose AC Servo

## Sales and Service

No. 10-20E

### Rating Plate Change for the AC Servo Motor (International Standards Compliance)

Thank you for your continued patronage of the Mitsubishi general-purpose AC servo and FA products. As the AC servo motors became compliant with the international standards, the print on the rating plate has been changed. We ask for your understanding in this matter.

1. Target Model

HF-JP series (0.5 to 5kW, 11kW, 15kW)

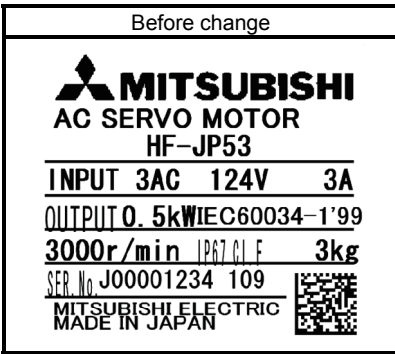

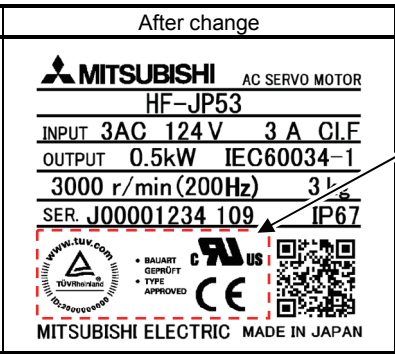

Note. For the international standards compliance of general-purpose AC servo motors excluding the HF-JP series, the details are shown in the Mitsubishi General-Purpose AC Servo Sales and Service (No.10-19E).

2. Purpose

To comply with the international standards (EC Directive and UL/CSA Standards)

3. Details of Change

As shown below, the TÜV, UL, and CE marks have been added sequentially on the rating plate located on the side of a servo motor. Additionally, the auxiliary rating plates for the CE mark have been deleted. This change does not affect the performance, functions, and parts of the servo motor.

Before change	After change

Added marks

4. Schedule

This change has been made sequentially from the September 2010 production. Because of inventories, old and new products may exist in the distribution stage. We ask for your understanding in this matter.
