Display LED Change for the General-Purpose AC Servo Amplifier

Thank you for your continued patronage of the Mitsubishi general-purpose AC servo and FA products. To improve the obtainability of parts and visibility of the display LED, we will change the display LED as follows. We ask for your understanding in this matter.

1. Target Models

MR-J3, MR-J3W, MR-J3-DU, MR-JN, MR-J4, MR-J4W, MR-JE

2. Purpose

To improve the obtainability of parts and visibility of the display LED

3. Details of Change

The display LED will be changed.

With the display LED change, the LED brightness will be changed. (Refer to Table 1.)

Both old and new display LEDs are in compliance with the European RoHS and Chinese RoHS standards.

Table 1 Display LED change

	Before change	After change
Appearance of display LED brightness (B series compatible with SSCNET interface)		
Appearance of display LED brightness (A series compatible with general-purpose interface)		

4. Schedule

The A series LEDs will be changed sequentially from the December 2014 production, and the B series LEDs will be changed sequentially from the January 2015 production. There may be cases when both new and old products are in the distribution stage. We ask for your understanding in this matter.

The above change does not affect the functions and performance of the servo amplifier.
