

## AC Servo Sales and Service

### Change in Appearance of AC Servo Motor Encoder Cover

Thank you for your continued patronage of the Mitsubishi Electric general-purpose AC servo. To improve the appearance of AC servo motors, the surface treatment of encoder covers will be changed from black plating to electrodeposition coating. This change does not affect the functions and performance of the products.

#### 1. Target Model

Rotary servo motor                      HK-KT series

#### 2. Details of the Change

To improve the appearance of AC servo motors, glossiness of their encoder cover surface will change because the surface treatment will be changed from black plating to electrodeposition coating. Figure 1 shows an example of an encoder cover. The size of the encoder cover varies depending on the model.

Figure 1. Example of outer appearance

#### 3. Schedule

This change will be made sequentially from the January 2020 production.

Note the following:

- (1) The schedule may be advanced or delayed depending on the stock status.
- (2) The products with both the former and new appearances may be distributed in the market around the same time.
