

AC Servo Sales and Service

Change in Appearance of AC Servo Motor Connectors

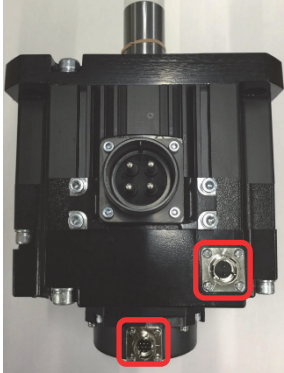

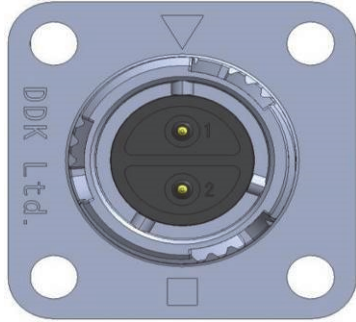

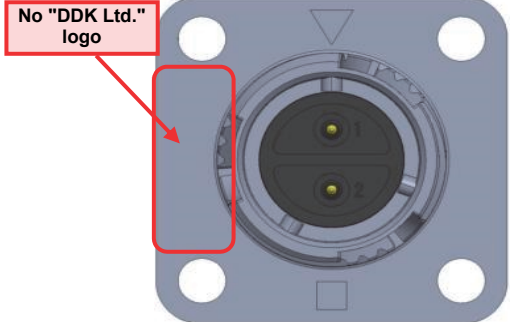

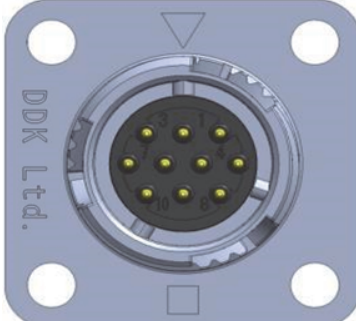

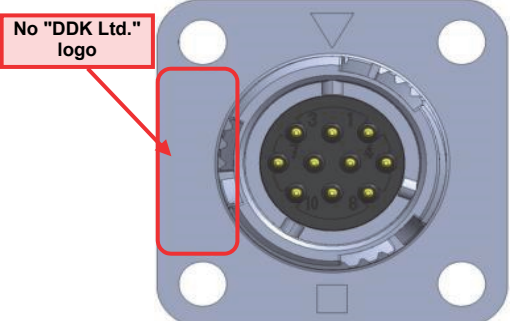

Thank you for your continued patronage of the Mitsubishi Electric general-purpose AC servo. The appearance of encoder connectors and brake connectors for AC servo motors will be changed (connectors with no logos will be used). This change does not affect the functions and performance of the products.

1. Target Model

Rotary servo motor HG-SR/JR/RR/UR/SN series

2. Details of the Change

The encoder connectors and the brake connectors will have no logos as the connector manufacturer has decided to remove the logos from them. We will use the same manufacturer.

		Before	After
 <p>Appearance example</p>	Brake connector		
	Encoder connector		

3. Schedule

This change will be made sequentially from the March 2020 production.

Note the following:

- (1) The change in the appearance of the encoder connectors may precede the brake connectors or vice versa.
- (2) Products with both the former and the new appearances may be distributed around the same time depending on the stock.
