

Change in Appearance of Encoder Connectors for AC Servo Motors

Thank you for your continued patronage of the Mitsubishi Electric AC servo system.
The appearance of encoder connectors for AC servo motors will be changed as follows.

1. Target Model

HG-JR series (6 to 12 kW: 1000 r/min, 7 to 15 kW: 1500 r/min)

2. Reason for the Change

To improve the obtainability of encoder connectors

3. Details of the Change

Along with the discontinuation of the encoder connector plating at the conventional manufacturer, the plating manufacturer will be changed.

This change applies only to the plating manufacturer of the applicable parts. The type of the plating, manufacturing process, and other specifications will not be changed.

* This change does not affect the performance, functions, and components of the products.

Description

Details of the change	Before	After
Appearance		

4. Schedule

This change will be made sequentially from the August 2021 production.

Note that, depending on the stock status, the products with both the former and new connectors may be distributed in the market around the same time.
