

## Sales and Service

### Change in the Encoder Connector for Direct Drive Motors

Thank you for your continued patronage of the Mitsubishi Electric AC servo system.  
The encoder connector for the direct drive motors will be changed as follows.

#### 1. Target Models

Direct drive motor TM-RFM series  
TM-RG2M series  
TM-RU2M series

#### 2. Reason for the Change

Production discontinuation of the resin material for the connector

#### 3. Details of the Change

Alternative resin material will be used for the encoder connector because of the production discontinuation of the conventional resin material.  
Along with this change, the model name (product number) of the encoder connector will be changed.  
This change does not affect the appearance, functions, and performance of the products.

Details of the change

	Before	After
Model name (product number)	RM15WTRZB-12P(72)	RM15WTRZB-12P(77)

Location of the encoder connector  
(Example) TM-RG2M series

Encoder connector

#### 4. Schedule

This change will be made sequentially from April 2022. Depending on the stock status, the schedule may be advanced or delayed, and the products with both the former and new connectors may be distributed in the market around the same time.
