

Sales and Service

Compliance of AC Servo Amplifiers with the WEEE Directive

Thank you for your continued patronage of the Mitsubishi Electric AC servo system. For a sustainable society, the symbol of the crossed-out wheeled bin will be added to the products. This symbol indicates that the product should not be discarded as unsorted waste but must be sent to separate collection facilities for recovery and recycling to reduce the amount of waste electrical and electronic equipment according to the Directive on Waste Electrical and Electronic Equipment (WEEE ^{*1}). This change does not affect the functions and performance of the products.

1. Target Model

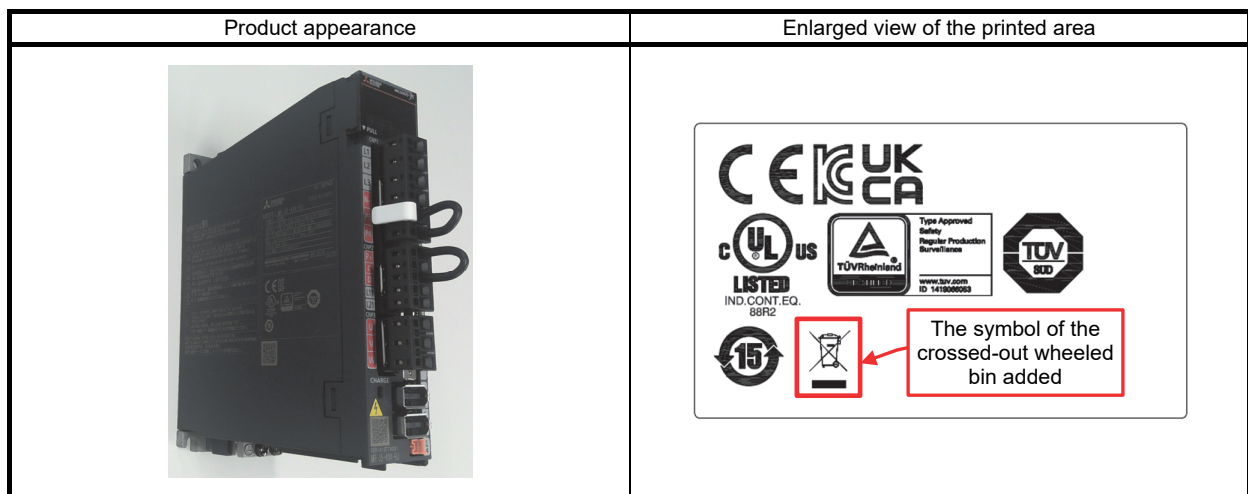

MR-J5, MR-J4, MR-JN, MR-JET, and MR-JE and their optional units (except for cables and connectors) ^{*2}

2. Details of the Change

The symbol of the crossed-out wheeled bin (Figure 1) will be added to the products.

Figure 1. The symbol of the crossed-out wheeled bin

- Note
1. The product shown in the figure above is an example. The size and position of symbols and contents vary with the models.
 2. The symbol may be added at different times depending on the model.
 3. Both products with and without the symbol may be distributed in the market around the same time depending on the stock status.

Figure 2. Example of the symbol on the product (MR-J5)

3. Schedule

This change will be made sequentially from the January 2023 production.

- ^{*1} Directive on Waste Electrical and Electronic Equipment (WEEE):
An EU directive aiming to reduce the amount of waste electrical and electronic equipment by promoting recovery and recycling of equipment.
- ^{*2} The symbol will not be added to the cables and connectors. According to Section 3.8 of Frequently Asked Questions (FAQ) on the WEEE Directive, cables used with other electrical and electronic equipment (servo amplifiers) do not fall within the scope of the Directive.
