Change in Terminal Boxes of AC Servo Motors

Thank you for your continued patronage of the Mitsubishi Electric AC servo system. For AC servo motors, the appearance of terminal boxes will be changed and terminal boxes from a different supplier will be used in addition to the current terminal boxes to improve obtainability.

1. Target Model

HG-JR 1000 r/min series (15 to 37 kW)
1500 r/min series (22 to 55 kW)

2. Reason for the Change

To improve obtainability

3. Details of the Change

The appearance of the current manufacturer's terminal boxes will be changed. Terminal boxes from a different supplier will also be used. Although the shape of the terminal box will not be changed, the appearance will be changed as shown below. The changes are shown below. These changes will only apply to the appearance and do not affect the functions and performance of the servo motors.

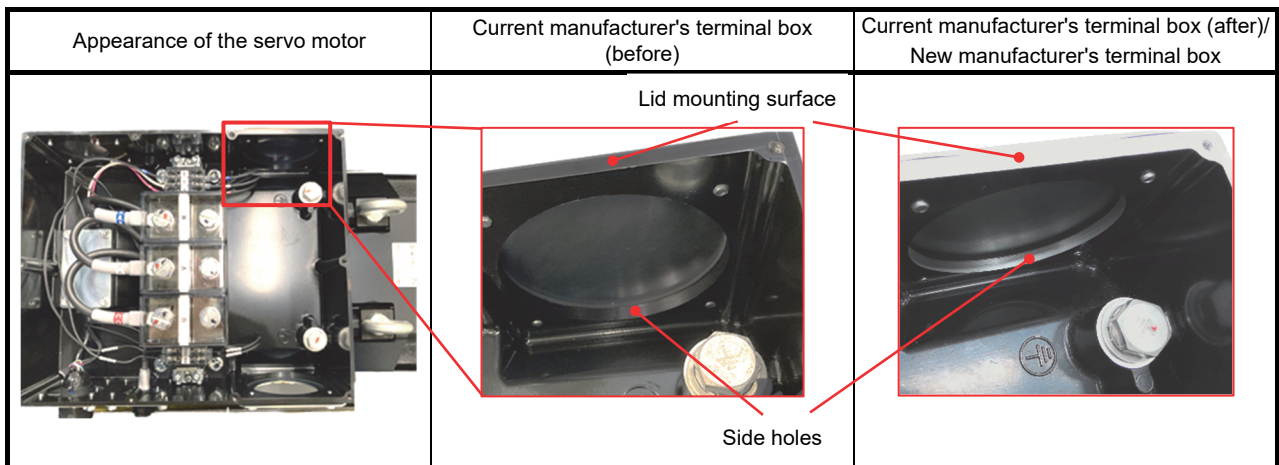

Figure 1. Appearance example

4. Schedule

This change will be made sequentially from the November 2023 production. Depending on the stock status, the schedule may be advanced or delayed, and there may be cases where both the former and new products exist in the distribution stage.
