

Version Update of the General-Purpose Inverter Option FR Configurator2 (Inverter Setup Software)

Thank you for your continued patronage of Mitsubishi Electric drive control products.
The general-purpose inverter option FR Configurator2 (inverter setup software) will be updated.

1. Details of the Version Update

- (1) Supporting the newest firmware version of the FR-E700EX (addition of the automatic restart after instantaneous power failure function)
The parameters related to the automatic restart after instantaneous power failure function can be read and written.
For more information on the version update, refer to Sales and Service No. 030E.
[Sales and Service No.030](#)
- (2) Addition of models compatible with the convert function
The convert function of parameters will be available between the FR-E720EX and the FR-E820.
- (3) End of support for Windows 10
The updated version (1.35M or later) will not support Windows 10.
Use computers with Windows 11.

2. Product Identification

The SERIAL (determined by date of production) can be checked on the DVD-ROM and the packaging label.

<u>AM</u> <u>5</u> <u>Y</u> Symbol Year Month	The SERIAL consists of two symbols, and two characters indicating the production year and month. The last digit of the production year is indicated as the Year, and the Month is indicated by 1 to 9, X (October), Y (November), or Z (December).
SERIAL	

The SERIAL on the packaging label has additional three characters indicating the control number after the four characters above.
