

## TECHNICAL BULLETIN

[1/3]

[Issue No.] GOT-A-0159

[Title] Change of the Storage Capacity of the User Area in the Operation Memory (RAM) for GT27 Models for Japanese Market

[Date of Issue] December 2020

[Relevant Models] GOT2000 Series GT27 Models

Thank you for your continued support of Mitsubishi Electric Graphic Operation Terminal (GOT). This bulletin informs you that the storage capacity of the user area in the operation memory (RAM) for the GOT2000 series GT27 models (except the 5.7-inch models) will be changed. The function version will be changed accordingly.

### 1. Models affected and schedule

| Model       | New function version | Schedule                        | Remarks |
|-------------|----------------------|---------------------------------|---------|
| GT2715-XTBA | C                    | From the May 2021 production *1 | -       |
| GT2715-XTBD |                      |                                 |         |
| GT2712-STBA |                      |                                 |         |
| GT2712-STBD |                      |                                 |         |
| GT2712-STWA |                      |                                 |         |
| GT2712-STWD |                      |                                 |         |
| GT2710-STBA |                      |                                 |         |
| GT2710-STBD |                      |                                 |         |
| GT2710-VTBA |                      |                                 |         |
| GT2710-VTBD |                      |                                 |         |
| GT2710-VTWA |                      |                                 |         |
| GT2710-VTWD |                      |                                 |         |
| GT2708-STBA |                      |                                 |         |
| GT2708-STBD |                      |                                 |         |
| GT2708-VTBA |                      |                                 |         |
| GT2708-VTBD |                      |                                 |         |

| Model  | New function version | Schedule                        | Remarks                  |

\*1 GOTs with the previous function version and those with the new function version may exist in the distribution stage.

**2. Details of the change**

The storage capacity of the user area in the operation memory (RAM) will be changed.  
The following shows the difference in the performance specifications before and after the change.

| Storage capacity of the user area |        | Remarks   |
|-----------------------------------|--------|---|
| Before                            | After  |   |
| 128 MB                            | 256 MB | The project data used before the change is usable as-is after the change. |

**3. Supported software and release schedule**

By using either of the following software products, project data that uses up to 256 MB of the operation memory (RAM) is usable.

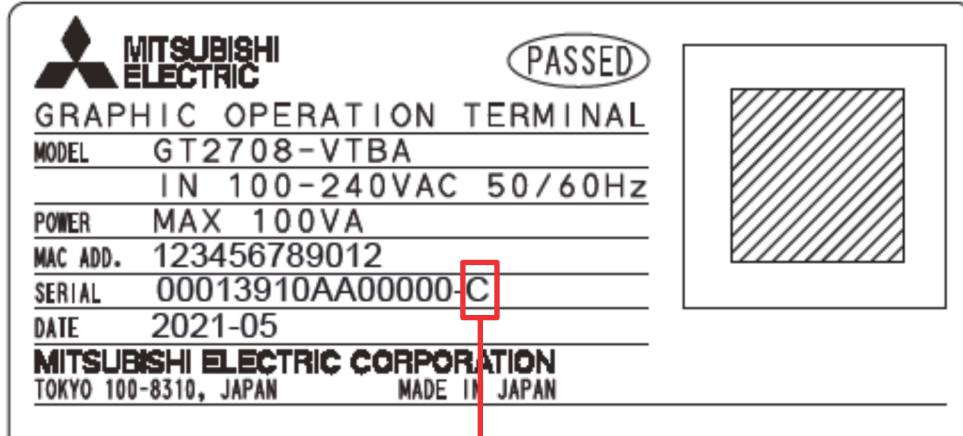

| Software   | Release schedule | How to obtain the software       |
|--|------------------|----------------------------------|
| HMI/GOT Screen Design Software<br>MELSOFT GT Works3    | Apr. 2021        | Contact your local sales office. |
| FA Integrated Engineering Software<br>MELSOFT iQ Works |                  |                                  |

[Issue No.] GOT-A-0159

**4. How to identify the new products**

The new products are the ones with the function version shown in "1. Models affected and schedule" or later.

Check the rating plate of the GOT for its function version.
