2. Reasons for Discontinuing Production

Recently, electronic components of the GOT, including microcomputers, memories, and ASICs have been increasingly difficult to obtain. The reason is that stricter process regulations have become standard in recent years. We also have to meet environmental conservation needs. There is a finite amount of parts remaining for the GOT-F900 series and A950 Handy GOT, and we will have difficulty maintaining the production system and product quality.

3. Alternative Models

For alternative models, we recommend such models that impose the least amount of restrictions in the specifications when transitioning from the GOT-F900 Series and A950 Handy GOT.

However, other models may be available depending on the application in your system. Please select a suitable model after confirming the specifications of your existing system.

When replacing the models, refer to the following.

- Replacement Guidance (JY997D39301)
- Precautions when Replacing GOT-F900 Series, ET-940 Series, or A950 Handy GOT with GOT2000 Series for Japanese Market (GOT-A-0128)
