[Issue No.] FA-A-0046

[Title] Precautions for using a dummy CompactFlash card
in the C Controller module

[Relevant Models] Q06CCPU-V, Q06CCPU-V-H01

[Page] 1/2

[Date of Issue] Sep., '08

Thank you for your continued support of Mitsubishi programmable controllers, MELSEC-Q series.

This technical bulletin provides the precautions for using a dummy CompactFlash card in the C Controller module (Q06CCPU-V, Q06CCPU-V-H01).

1. Precautions

When installing a dummy CompactFlash card to the C Controller module, use the dummy CompactFlash card installed when shipping. Do not use any dummy CompactFlash card that has no "A" shown in the Figure 2 in the products whose serial number (first four digits) is "1008" or later as shown in the Figure 1. Failure to do so may disable the removal of the dummy CompactFlash card, resulting in damage to the CompactFlash card slot.

A dummy CompactFlash card with "A" shown in Figure 3 printed is installed to the products whose serial number (first four digits) is "1008" or later when shipping.
