

Manual Indication of Compliance with China RoHS 10 Substances

■Date of Issue

September 2025

■Relevant Models

Powder clutches/brakes, and tension controllers

Thank you for your continued support of Mitsubishi Electric powder clutches/brakes, and tension controllers.

With the addition of 4 phthalate esters restricted by China RoHS effective January 1, 2026, the list of hazardous substances and their contents (in Chinese) with 10 substances shall be attached to the product or described in the manual included with a product.

There is no impact on the general specifications, performance specifications, functions, and external dimensions of products due to the changes.

1 REASON FOR THE CHANGES

On June 29, 2024, GB/T26572-2011 "Requirements of concentration limits for certain restricted substances in electrical and electronic products" was amended, and 4 phthalate esters were added as the restricted substances.

We are required to change the list of hazardous substances and their contents in electrical and electronic products (in Chinese) from 6 substances to 10 substances about the products manufactured from the restriction start date January 1, 2026.

2 DETAILS ON THE CHANGES

The list of hazardous substances and their contents (in Chinese) with ten substances shall be attached to the product or described in the manual included.

For products with the description corresponding to China RoHS 6 substances in the manual included with a product, refer to the list of hazardous substances and their contents (in Chinese) with 10 substances attached to the product as the correct reference.

3 RELEVANT MODELS

Powder clutches/brakes, and tension controllers (Discontinued models are excluded.)

4 CHANGEOVER PERIOD

The changes will be applied to the products to be manufactured from October 2025.

There may be cases where products before the change and after the change exist in the distribution stage.
