

## Changes to the external appearance of LE7-40GU-L type tension controller

■Date of Issue

February 2020

■Relevant Models

LE7-40GU-L

Thank you for your continued support of Tension Controller.

We would like to announce the changes of the external appearance of LE7-40GU-L type tension controller.

There is no impact on the general specifications, basic specifications, and functions due to this change.

### 1 Object models

LE7-40GU-L

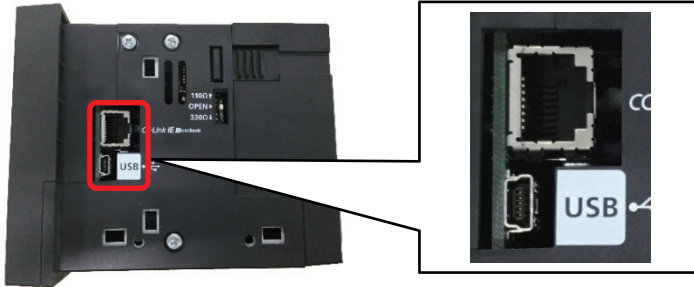

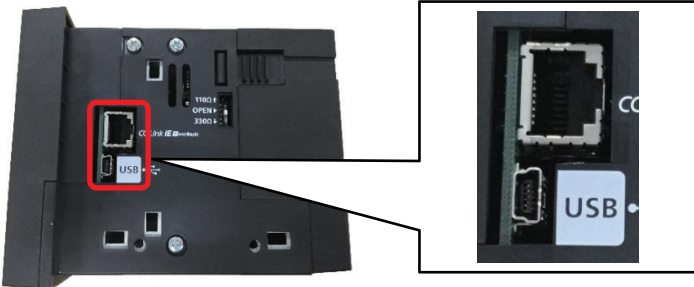

### 2 Reason for the change

For quality improvement of LE7-40GU-L type tension controller, the external appearance will be changed.

### 3 Content of the change

#### 3.1 Changes of the external appearance of the Ethernet interface and USB interface

The Ethernet interface and USB interface on the side of LE7-40GU-L type tension controller will be changed as below.

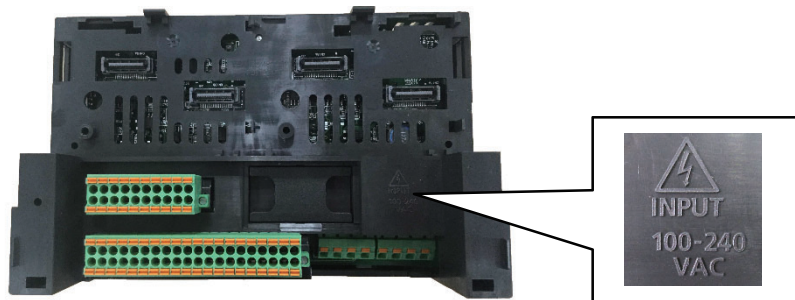

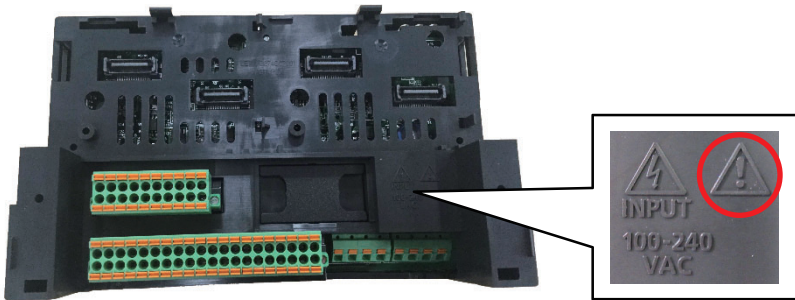

Changed items: Ethernet interface and USB interface	
Before change	
After change	<p>The gap between the Ethernet/USB interface and the case will be reduced.</p> 

ZD-5052A

### 3.2 Addition of warning display

The name of the terminal is written on the back cover. When the back cover is detached, the name of the terminal cannot be recognized and it may cause electric shock or malfunctions by miswiring.

In the installation or wiring, check the instruction manual or the name of the terminal written on the back cover.

Changed Items: Addition of warning display	
Before change	
After change	

## 4 Changeover period

The changes will be applied to the products manufactured in March 2020 and later.

Depending on stock status, both the old and new products may be distributed in the market around that time.
